New "Cold" Process of Galvanizing.

In use for more than two years with best and absolutely satisfactory results. Articles that cannot be galvanized by any other process, such as screws, nuts, cutting instruments, tools of every description, springs, locks, artistic metal articles, can be galvanized in a superior manner by this process. The multitude of articles that can be galvanized is without limit. Uniformly smooth surface is preserved, thickness of coating can be regulated, saving of spelter about 80%, besides many other advantages. *We grant licenses for territory, also shop rights on royalty basis.*

Fulton Engineering & Ship Building Works

We undertake to do all kinds of Repairs of Vessels, Iron and Steel Boilers of Steamers in the most reliable manner

San Francisco Sept. 29/98.

Hoyt Metal Co.,

St. Louis, Mo.

Gentlemen:-

Reporting on the merits of the Nickelehe Babbitt Metal, we have used a large quantity of it with the most satisfactory results. It has given better satisfaction than any other babbitt metal we have used, including all the standard brands, particularly for electric and marine engine bearings where it is subject to the severest duty.

We will be pleased to give you or others the names of steamers using it, also the names of their engineers and owners to whom any one can write. Without exception we believe, that all will speak favorably of it and from our own experience with it and other metals we decidely recommend it.

Very truly,

FULTON ENGINEERING & SHIP BUILDING WORKS.

Dict. by J. S. Sr. *James Speirs Pres*

YOU WILL SEND US AN ORDER.

HOYT METAL CO.. ST. LOUIS, MO. ARLINGTON, N. J

Nickelene, although very hard, is so tough that it can be hammered to a knife edge.

Nickelene is being used by many in place of Phosphor Bronze.

Nickelene can be melted in an iron ladle or kettle, and at a little higher temperature than that necessary for melting Babbitt Metal, runs freely and makes a good casting.

NICKELENE IS THE BEST BABBITT METAL IN THE WORLD.

ATLAS METAL.
TENSILE 50,000 POUNDS.
Atlas Metal is defined by Prof. Charles James, the well-known Steel Expert, as "A New Commercial Product, standing between Iron and Steel, and uniting in itself the best characteristics of both."
ITS CHIEF POINTS ARE
GREAT STRENGTH. GREAT WEAR. UNIFORMITY. EASILY MACHINED.
HOMOGENEOUS.—Atlas Metal is not surface treated—the castings can be made of any weight, size or thickness, and the metal will be of uniform structure and entirely homogeneous throughout.

A Course in Mechanical Drawing.

BY

JOHN S. REID,

Instructor in Mechanical Drawing and Designing, Sibley College, Cornell University, Ithaca, N. Y.

8vo. v + 128 pages, 168 figures.

CLOTH, $2.00.

This course contains, in the author's judgment, a complete and concise statement, accompanied by examples, of the essential principles of mechanical drawing—all that any young man of ordinary intelligence needs to master, by careful study, the more advanced problems met with in machine construction and design.

HEADINGS OF CHAPTERS:

The Complete Outfit, Illustrated.
Instruments.
Geometrical Drawing.

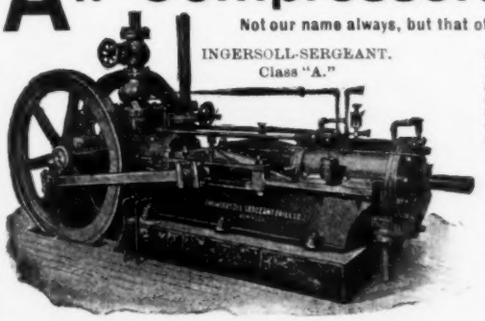
THE NORWALK IRON WORKS CO., SOUTH NORWALK, CONN., MAKERS OF AIR AND GAS COMPRESSORS FOR ANY VOLUME AND FOR ANY PRESSURE.

Air Compressors

Catalogue No. 32.

Not our name always, but that of others to show what can be done.



INGERSOLL-SERGEANT. Class "A."

The Passaic Rolling Mill, Paterson, N. J., with a monthly output of 5,000 tons of structural steel, use 40 cylinder hoists, 12 riveters, 5 drills and reamers, 2 chipping tools and other apparatus, all operated by compressed air from an Ingersoll-Sergeant Class "A" Straight Line Piston Inlet Air Compressor. The plan of distribution of air power necessitated careful engineering and close investigation of the merits of Air Compressors to secure good results. It is the high-class machine, built rigidly, embodying every detail of scientific construction, that wins in a test like this.

Catalogue No. 41, ROCK DRILLS Mines, Quarries, Tunnels Contract Work, Good Roads.

PUMPING MACHINERY

FOR EVERY SERVICE

SINGLE DUPLEX AND CRANK AND FLY WHEEL TYPES.

Don't be misled by the manufacturers of steam and electric pumps who try to talk you into buying one of their poorly constructed machines because it is low in price. "The best is the cheapest." Worthington Pumps have always been conceded the best; hence, even if their first cost appears high, they will prove the safest investment in the end.

WE HAVE HEARD IT SAID

(By those who do not know) that our COCHRANE HEATERS and COCHRANE SEPARATORS are high priced NOT SO—anything but high priced. May be you got the idea because we keep telling you how good they are—what good things we put in them. Like well built mince pies they have a first-class casing and "INSIDES" which make them worth trying.

We don t make the cheapest heater on the market—can do it, but won't. Somebody has to decide what should go in a heater. Having 13 or 14 years of experience right in this line—we've decided—and there's no skimping

No other heater can give hotter water and better purification—is more durable or easier to clean.

Did you ever clean a heater? Not an easy matter unless it's a "COCHRANE."

Shall be pleased to hear from you.

LIQUID BRAZING.

The economies and advantages of liquid brazing are not confined to bicycle manufacturers, although they are the ones that have developed it and demonstrated its great advantage and economy over the old-time fire brazing.

One bicycle manufacturer estimates that he is saving twenty dollars per day every day he runs the new system, besides requiring fewer workmen and less fuel.

A descriptive pamphlet will be sent to all who are interested.

Manufactured by **BOSTON BELTING CO.,** James Bennett Forsyth, Mfg. Agt. and Gen. Mgr.

BOSTON. NEW YORK. BUFFALO. CHICAGO. MILWAUKEE. KANSAS CITY.

THINK OF IT. . .

If a person is entangled in machinery driven with a Friction Clutch, a life may be saved by moving the lever.

Shifting Belts wear out rapidly, and the lacings need frequent attention.

If 100 men are employed in a factory and it is necessary to stop the whole factory five minutes for repairs, or to put on a belt in one department where only 20 men are at work, 100 men will be idle five minutes, which equals five hundred minutes, or **eight and one-half hours.**

If that department is driven with a Friction Clutch, only the time of the men in that department will be lost.

Then Write for Our FRICTION DEPT. CATALOGUE.

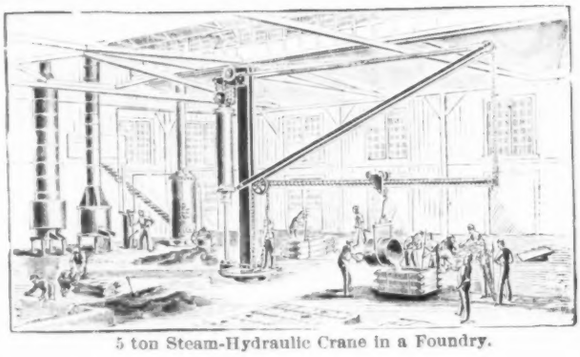
WORKS

Do You Suppose We Care

Whether you get Ridgway Cranes or not? If we could keep busy building Ridgway Cranes for people all through the 7 lean years since 1892 do you reckon we have any trouble now in this fat year 1899? And so why should we care if you are thick-headed and cannot take a hint?

But we do care just the same and are advertising for you just as earnestly as we ever did. We want to add you to the goodly company of those who sing the praises of the wonderful Ridgway Crane. Did you ever stop to consider that nearly all of the first-class establishments in the land use Ridgway Cranes? We do not suppose there is another machine that has such a distinguished following as the Ridgway Crane The reason for it is simply the wonderful money making qualities of the Ridgway Crane If you knew the Ridgway Crane you would have your order with us within the next 24 hours.



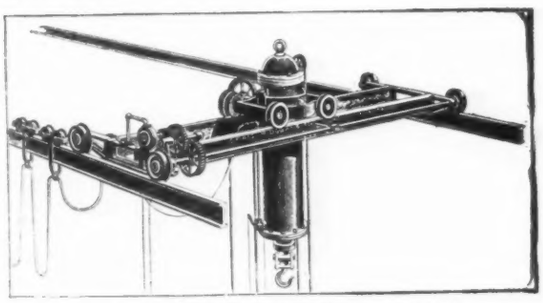
5 ton Steam-Hydraulic Crane in a Foundry.

Just to think of a machine so commonplace as a swing crane—just a swing crane—going into a foundry and working so marvelously that the same molders are able to turn out 50 per cent. more work for same wages!

HYDRAULIC AIR HOISTS.

Which they ain't at all, for they work by air and the hydraulic only comes in on the hold-back. A little oil in the piston rod does it and makes the air hoist a perfect machine.

Only one thing the matter with Ridgway Air Hoists—you can't get them quick. We cannot make them fast enough to supply the demand. So if you are going to get an Oil Governed Hoist get your order in far ahead of your wants.



"Please Take the Elevator."

If your lift is short this will save you lots. . .

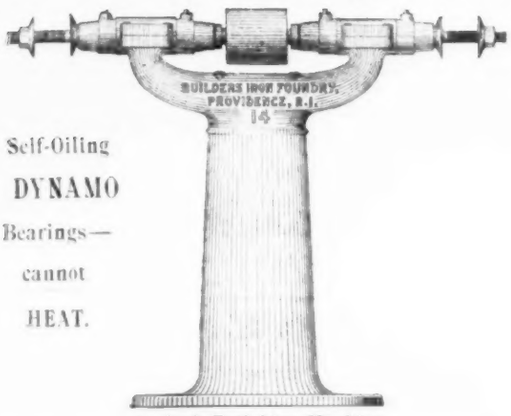
GRINDING AND POLISHING MACHINERY.



14-inch Polishing Machine.

Self-Oiling DYNAMO Bearings—cannot HEAT.

The head of the machine here shown is constructed so as to give plenty of room between the wheels and the column, thus making the machine of especial advantage where awkward pieces are to be handled, as bicycle, chandelier, and similar classes of work

The bearings provided are peculiar to the machine, the boxes being so constructed that the spindle has four bearings, thus affording a good support and making the machine stiff and durable.

A Self-Oiling Device, similar to that used on the best class dynamos, is provided.

THE D. E. WHITON MACHINE CO.,
New London, Conn.

BAD TEMPERED CHUCKS.

Drill chucks that can't keep their temper have lost many a machinist's temper too.

The jaws soon wear, and the drill slips—always at a critical time

Pratt Positive Drive Drill Chucks keep both their own temper and the machinist's. Tools held by them never slip The flat end of the drill is inserted in the positive driver just above the jaws, and once there it cannot slip, even if the jaws are not tight. The Pratt Chucks are made to standard gauges, and are interchangeable. Cost no more than ordinary kinds. Send for booklet.

PRATT CHUCK CO.,

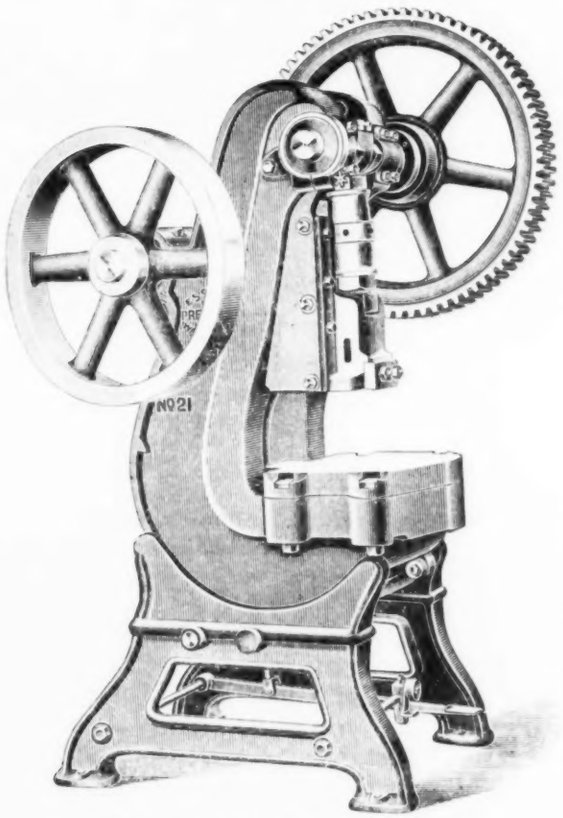
The .... E. S. Stiles Press Co.



No. 21 Adj. Incline Press.

Factories: { WATERTOWN, N. Y.
CARTHAGE, N. Y.

N. Y. Office, 243 Centre St. Telephone, 2351 Spring.

ADJUSTABLE INCLINE PRESSES.

The frame is heavy, with a great amount of metal so distributed as to give great strength and rigidity under severe service. The sides or columns are tied by braces at the top, back and bottom. The Press is open through the back, thus permitting the work to be fed either from side to side or from front to back, as the operator may desire. The wheel is accurately turned and fitted with three hardened tool-steel pins, which make the action of the Press, in response to the treadle, instantaneous. The shaft is of open-hearth machine-steel, and is turned from a forging to accurately fit the bearings in the Press which are bored from solid metal and then scraped to a perfect bearing. The connection is strong and accurately scraped to fit the wrist of the shaft, and held rigidly in place by machine steel check nuts. The base of the connection where it bears in the slide is broad and has large bearing surface carefully scraped and held in place by a tool-steel pin.

The slide is long and has V gibs for taking up the wear, and at the same time always keeps its alignment. It is arranged for a knockout which will be supplied when desired, and will take any size or shape of punch stem. The cap of the slide is held in place by studs instead of cap screws, so that in case the thread becomes worn the studs can be replaced without the necessity of retapping or making a new slide.

The bed is planed accurately with the bottom of the slide. The legs are well designed, giving ample surface for rigidity, and are bolted to the frame by four screws, which being loosened, the frame can be readily inclined to 40 degrees, for the use of combination dies, permitting the work to fall away by gravity. The clutch is simple and very strong, all parts being made of tool-steel and hardened. The contact points are flat surfaces, instead of round, as in most clutches, giving longer life to the parts and making them less liable of "chipping" off. The clutch is instantaneous in its action and absolutely safe, as it is impossible to throw the clutch into action while setting dies even when the wheel is in motion. Each press is supplied with one solid bolster plate, four forged bolster bolts and necessary wrenches.

PRESSES

And Special Machinery.

"Bliss" Double Roll Feed Perforating Presses.

We make these presses with or without gearing, of almost any size and width up to a capacity of punching sheets 8 feet wide and ⅜ inch thick.

Where the punches are small, and the metal to be perforated heavy, we make these presses with our **cam-actuated stripper,** permitting the use of short, "stocky" punches, which are not liable to break or bend. Our **dies and punches** in that case are so arranged that they **can be separately adjusted, removed, and replaced in a few minutes** without removing the sheet from the machine.

Our new **No. 156 Machine** will punch in ten hours forty sheets of No. 16 iron with ⅜ inch round perforations of the usual pattern. This is largely in excess of the capacity hitherto attained in work of this class. (Sheet 50 in. x 8 ft.)

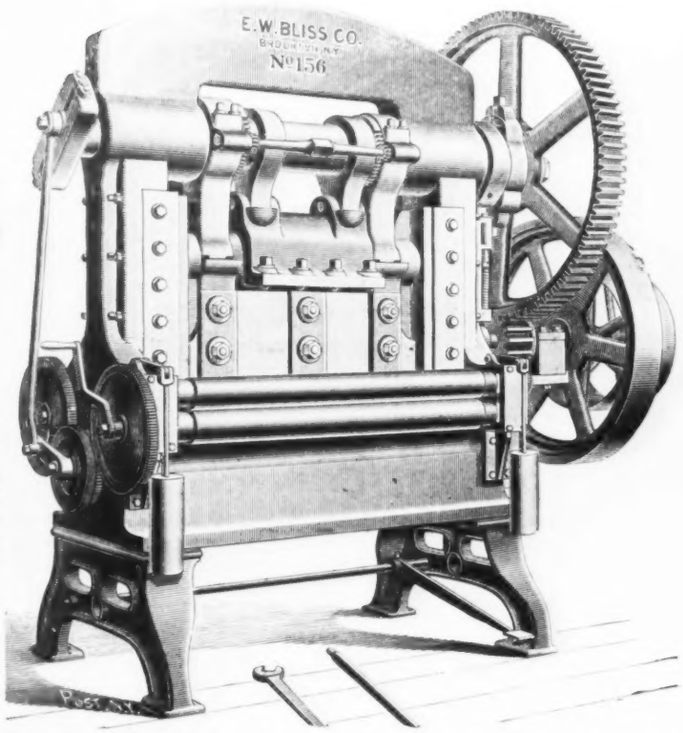
The following two sizes are the most useful for general work in this line:

No. 156, for sheets up to 50 inches wide, including one set of dies for double row perforations (about 240 round holes ⅜ inch diameter). Dies separately removable and adjustable. Weight, about 16,000 lbs.

No. 156, for sheets up to 36 inches wide, including one set of dies for double row perforations (about 180 round holes ⅜ inch diameter). Dies separately removable and adjustable. Weight, about 15,000 lbs.

Write for Further Particulars.

Correspondence Solicited.



"Bliss" No. 156 Perforating Press, with Double Roll Feed and Cam-Actuated Stripper. (Patented.)

Locations for Industries.

The Chicago Milwaukee and St. Paul Railway Company has a list of its territory districted in relation to resources, adaptability and advantages for manufacturing, and seeks to secure manufacturing plants and industries where the command of raw material, markets and surroundings will ensure their permanent success.

A number of new factories and industries have been induced to locate—largely through the instrumentality of this company—at points along its lines.

The trend of manufacturing is Westward. Confidential inquiries are treated as such. The information furnished a particular industry is reliable.

AMERICAN RAILWAY SUPPLY COMPANY,

Manufacturers of

Baggage, Hotel and Time Checks, Metal Figures and Letters and everything in the line of Stamped Metal Work.

24 PARK PLACE, NEW YORK.

We have purchased the entire equipment of the Warwick Cycle Mfg. Co. of Springfield, Mass., and are offering it in lots to suit purchasers at prices which we believe will insure quick sales.

This consists of over 250 machine tools and their appurtenances and a large amount of material both raw and in process.

The tools are all modern and in excellent condition (in fact a large portion of them are nearly new) and are adapted to general machine shop use.

We are also offering the Real Estate, which consists of a modern three story building 325 ft. x 52½ ft., with ells, built in 1892.

This property is equipped with a Steam plant of 125 H. P., Electric Light plant, patent Hot Water Heating system, sprinklers, etc.

It is but ten minutes' walk from the Massasoit House and has a railroad track side of building to facilitate shipping.

It is suitable for any kind of manufacturing business and will be sold at a great sacrifice.

Any one looking for a manufacturing property will find it profitable to look this over before purchasing.

Full particulars as well as a complete list of the Tools, etc., will be mailed upon application.

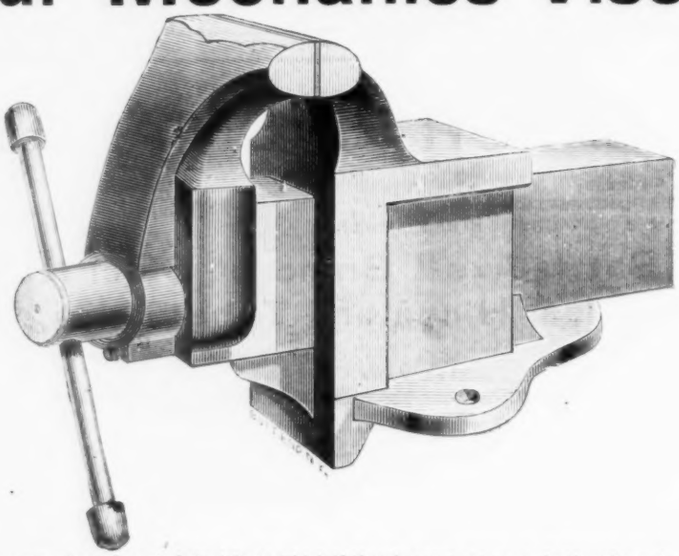
Our Mechanics' Vises.



These vises have inserted steel faces which if they become worn or battered can be removed and new ones attached without trouble.

The screw is fastened by a nut at the rear end, which is not only a substantial method but any wear can be taken up and thus save lost motion. The Vises have worked their own way into market and both the domestic and foreign demand for them is now good. There are no cheaper Vises made, the quality considered.

HEINISCH

TRADE-NAME ON SHEARS, TRIMMERS, &C.

The U. S. Circuit Court, Southern District of New York, Judge Townsend, has rendered a decision in the suit of "R. Heinisch's Sons Co. vs. Hermann Boker & Co."

"The Complainant is entitled to an accounting, and to an injunction restraining them from using the names 'Heinisch' or 'H. C. Heinisch' on its Shears, Labels, etc., and otherwise, in any way which will interfere with Complainant's enjoyment of the benefits of its Trade-name."

Referring to the above decision we would respectfully state our determination to protect our rights in the premises and warn all persons against any imitation of our Trade-name.

LEADERS.

You Can't Make Good knives any more than good bread without the right material, and even if you have the right material you can't make good knives if you don't know how to manipulate that material.

Solid Cocobolo Swell Handle with Bolster.

WARRANTED NOT TO GET LOOSE.

No. 146, 5, 5½, 6, 6½, 7 and 8 Inch.

Five Rivet, Scaletang Beech Handle.

NOT SO MUCH TO LOOK AT, BUT A CUTTER.

No. 446, 5, 5½, 6, 6½, 7, 8, 9, 10, 11, 12, 13 and 14 Inch.

The Steel That Goes into Goodell Butcher Knives is made for Goodell Butcher Knives and is found in no others. It is the same we have used for years. A quarter century experience has taught us how to manipulate that steel to produce the best results.

It costs more to make a good knife than a poor one, but not so much more as you might think (if you know how).

WE WARRANT OURS.

The '98 Chicago Clipper Retails For $8.75.

HARDWAREMEN—DO NOT ORDER

another old-fashioned, out of date two-hand horse clipper. Be enterprising and order the '98 CHICAGO CLIPPER. The greatest clipping machine ever invented; holds the world's record for fast clipping; time 14 minutes. You can sell one of these machines to every man who used to buy the old fashioned two-hand variety. Ask your jobber about them or send to us direct.

HAIR CLIPPERS.

If you want a clipper "with a reputation" insist on the "Stewart Patent." There is no other "just as good" and they will cost you no more than the inferior kind.

We have just been awarded Gold Medal at Trans-Mississippi Exposition, highest and only award for horse clipping, sheep shearing and cattle grooming machines.

Dry Battery Portable Electric Safety Lamp...

This is an Electric Lamp set in a White Enamel Parabolic Reflector, and can be attached to the cap or any part of the clothing by means of a stick-pin attached to reflector and connected to the battery with a flexible cord. The battery is arranged to be carried on a belt or in the pocket. So the user has free use of hands. The current can be turned off when not in use. Dry batteries are used and can be recharged from direct Incandescent Electric Current Charger and full directions go with each Lamp.

IS USED BY THE FOLLOWING: For Watchmen, Miners, Mine and Gas Inspectors, Boiler Shops, Oil and Gas Works and Gas Fitters, City Sewer and Underground Cable Inspectors; Powder Mills and Warehouses where explosive materials are manufactured and stored; exploring cellars and trenches where leaks occur, and investigating pipe connections where it is impossible to carry an oil lamp or candle for fear of explosion—and all parties requiring a safe portable light. The whole outfit is neat and compact.

No. 1 weighs 2 lbs., 1½ C. P. Price complete, $4.00. For Meter Reading Only.

No. 2 weighs 3 lbs., 4 C. P. Price complete, $6.00. For General Use.

No. 3 weighs 12 lbs., 10 C. P. Price complete, $12.00. For Several Persons to Work By.

Manufactured by...

CARPENTRY AND BUILDING

Series No. 2.

Modern American Dwellings

With Constructive Details.

The Most Elaborate and Complete Volume of Plans Ever Brought Out for the Use of Architects, Builders and Home Seekers.

BY NUMEROUS ARCHITECTS.

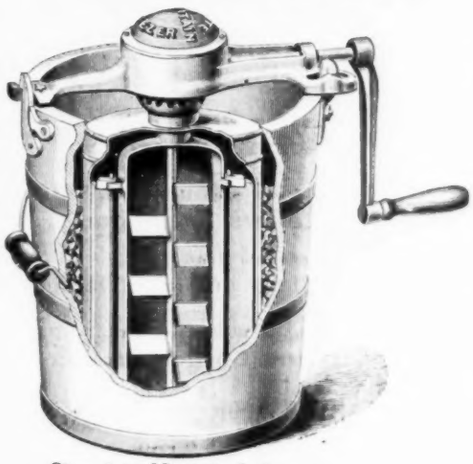
A selection of thirty-seven designs of artistic suburban dwellings erected in various sections of the country, at a cost ranging from $2,000 to $5,000, and embracing floor plans, elevations and constructive details showing interior and exterior finish, all drawn to a convenient scale, together with brief extracts from the specifications.

Those who contemplate building a home will find this volume of great value. In connection with each design is given the necessary floor plans, elevations and constructive details as will enable any practical builder to execute the work. The plans are diversified in both the interior arrangement and external appearance, and will afford to persons of various requirements an opportunity to select a home suited to their taste and convenience.

33 Half-Tone Engravings. 127 Full Page Plates of Elevations, Floor Plans and Constructive Details. 40 Pages of Descriptive Text. Size 9 x 13 in. (oblong), Handsomely bound in cloth. PRICE $2.00.

DAVID WILLIAMS COMPANY, Publishers, 232-238 William St., N. Y.

WHITE MOUNTAIN FREEZERS



Sizes 1 to 25 qt. inclusive.

THE REASON WHY

You should sell WHITE MOUNTAIN Freezers is because they will produce better and more cream cheaper and quicker than any other. This is what the consumer wants. Isn't what the consumer wants what you want to sell?

REPRESENT perfection in Ice Cream Freezers. They have all practical improvements—every meritable feature of other classes and many exclusive to themselves.

Leading Dealers Everywhere Sell Them.

THIS volume has been compiled from the extended series of articles in *The Iron Age*, on the arrangement of Hardware Stores, and contains a large and varied mass of information in regard to store arrangement.

A chapter is devoted to each subject and all are fully illustrated.

The summary of contents will convey an idea of the wide scope of the work, which treats of almost every subject connected with the arrangement of Hardware Stores.

Every hardware merchant should have a copy.

"Invaluable to all Dealers"

CARIBOU, Me.

David Williams Company:

I bought a copy of THE AMERICAN HARDWARE STORE from you, and I am glad to tell you that the book is, in my estimation, invaluable to all dealers.

It is exactly what I wanted, and by its help I have begun a radical change in our retail department, and am having built shelving and cases that will be of incalculable benefit, besides being very handsome in appearance.

W. C. SPAULDING.

450 Pages. 500 Illustrations.

Price, $3.00.

DAVID WILLIAMS COMPANY,

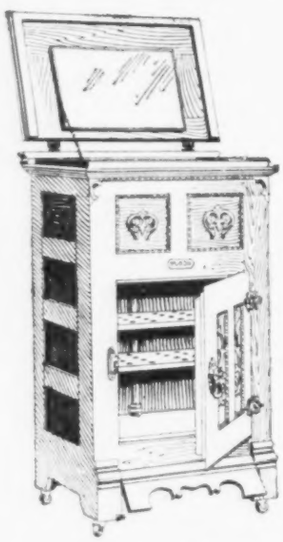
YUKON Refrigerators.



The Yukon combines all the best points of the best makes with several new features, which makes it the best Refrigerator on the market.

The Yukon is made in two styles, with ***Removable Flues,*** and with the ***entire Ice Chamber Removable.***

We note some of the excellent features of the Yukon:

Thoroughly seasoned ash lumber.
Elegance of finish.
Carved panels.
Swinging and removable base board.
Solid bronze hardware, Roman gold finished.
Zinc lined. Patent casters.
Galvanized iron flues, ice rack and shelves.
The shelves being so constructed that small dishes placed upon them will not tip over.
Patent Trap, connected with waste pipe in bottom of provision chamber, where it is most accessible, both trap and waste pipe being easily removed cleaned and replaced, without a back-breaking process or poking with a stick.
The insulation used is ***Granite Rock Wool*** and Charcoal Sheathing.
Buy the Yukon and you will have the best Refrigerator made as well as an elegant piece of furniture.

WILCOX MFG. CO., - - - AURORA, ILLS.

THE TOLER
Liquid Door Check and Spring.

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.

Regular finish, Gold Bronze No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

GLIDDEN'S METALLIC REPAIR OUTFIT

The one that has the Hinged Plugs.

THIS is the smallest, neatest, most compact and practical repair outfit ever offered to the public. Complete in a tin box 1½ inches long, 1 inch wide and ¼ inch thick. It will repair a puncture at once, without the use of cement, and any woman or child can use it. The plug is made of metal with a **hinged head, which can be forced into a much smaller opening than one with a stationary head.** Two sizes of plugs are furnished with each kit, which will fit ordinary punctures; also a cutter is furnished, to be used when the puncture is too small to admit the plug.

Directions for use. Place the flat plate of the plug so it will be loose on the key. Screw the key into the plug and insert into the hole, leaving the flat plate on the outside of tire. Draw back the key so that the plug will rest flat on the inside of the tire. Screw the flat plate to plug with wrench (left hand thread), and turn key to right. Remove the key by turning to left, and you have a permanent repair which does not injure the tire or its looks.

DISCOUNT TO THE TRADE, ASK YOUR JOBBER FOR IT.

BICYCLE REPAIRING

A Manual of Practical Methods of Repairing Bicycles.

By S. D. V. Burr.

Fourth Edition, Revised and Enlarged.

Cloth Bound. 208 Pages. 205 Illustrations.

THE BICYCLE is treated as a machine composed of many parts, each of which may be damaged to a greater or less extent. Each injury to each part is discussed fully, and the best methods of making the necessary repairs are explained thoroughly. The treatment of assembled parts, in such operations as brazing, nickel plating, enameling and the like, is described in detail.

Almost every topic is illustrated with one or more original engravings.

The book deals with the simplest and most useful appliances for repairing. It is in every way practical. It is recommended not only to manufacturers of bicycles, but more particularly to all those who handle bicycles, whether as dealers or repairers.

Price, Post-paid, One Dollar.

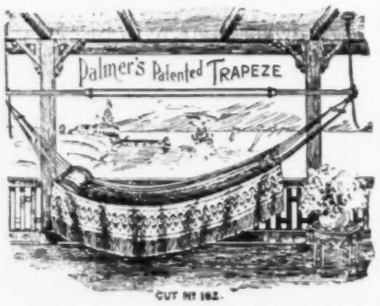
INFRINGERS ARE BEING PROSECUTED.

PALMER'S ARAWANA (Patented).

As used with Trapeze Suspension



CUT No. 162.

The above figure shows an Arawana slung from a Trapeze adjusted to its maximum extension as regards its suspension from the ceiling.

The Trapeze Suspension, as may be seen at a glance, is especially adapted to Veranda use, is adjustable to different sizes of Hammocks within its scope (from 6 ft. 9 in. to 11 ft.) and to giving different degrees of dip and heights of suspension. Every conceivable swinging motion is obtained without effort.

OILLESS BEARINGS.

A strong letter of commendation from a firm whose reputation is "world wide" as the manufacturers of the celebrated "PEARLINE."

NEW YORK, Nov. 26, 1897.

NORTH AMERICAN METALINE CO., 43 Third St., Long Island City, N. Y.

Gentlemen: Your favor of 20th inst. received; in reply are pleased to say that your Metalined Bushings have given us entire satisfaction. We first applied them in 1886 or '87 under very trying conditions, put them in fast running loose pulleys with high tension belt, and they gave perfect satisfaction; since then, we have extended their use throughout our works, and they have given satisfaction wherever we have placed them. Very truly yours,

JAS. PYLE & SONS.

FOR great Tensile Strength, Elasticity and Elongation, coupled with unusual Non-Corrosive qualities,

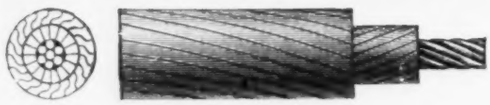
New "Cold" Process of Galvanizing.

In use for more than two years with best and absolutely satisfactory results. Articles that cannot be galvanized by any other process, such as screws, nuts, cutting instruments, tools of every description, springs, locks, artistic metal articles, can be galvanized in a superior manner by this process. The multitude of articles that can be galvanized is without limit. Uniformly smooth surface is preserved, thickness of coating can be regulated, saving of spelter about 80%, besides many other advantages. *We grant licenses for territory, also shop rights on royalty basis.*

GALVANIZING DONE AT OUR PLANT.....
9-11 Franklin St.

U. S. Electro Galvanizing Co.,
348 Broadway, New York.

WIRE ROPE All kinds that others make, and some that others do not. For instance,
THE
PATENT LOCKED-WIRE ROPE



Note the smooth surface, and how the exterior wires interlock, resulting in long life, and no displacement of wires. Nothing equal to it as a track cable for Hoist Conveyors. Also, Iron and Steel Wire of all kinds.

Manufactured by **THE TRENTON IRON CO.**, Trenton, N. J.

Fulton Engineering & Ship Building Works

San Francisco Sept. 29/98.

Hoyt Metal Co.,
St. Louis, Mo.

Gentlemen:-

Reporting on the merits of the Nickolehe Babbitt Metal, we have used a large quantity of it with the most satisfactory results. It has given better satisfaction than any other babbitt metal we have used, including all the standard brands, particularly for electric and marine engine bearings where it is subject to the severest duty.

We will be pleased to give you or others the names of steamers using it, also the names of their engineers and owners to whom any one can write. Without exception we believe, that all will speak favorably of it and from our own experience with it and other metals we decidely recommend it.

Very truly,
FULTON ENGINEERING & SHIP BUILDING WORKS.

Dict. by J. S. Sr. James Spiers Pres

YOU WILL SEND US AN ORDER.

HOYT METAL CO., ST. LOUIS, MO. ARLINGTON, N. J

Nickelene, although very hard, is so tough that it can be hammered to a knife edge.

Nickelene is being used by many in place of Phosphor Bronze.

Nickelene can be melted in an iron ladle or kettle, and at a little higher temperature than that necessary for melting Babbitt Metal, runs freely and makes a good casting.

NICKELENE IS THE BEST BABBITT METAL IN THE WORLD.

WRITE US FOR PRICE

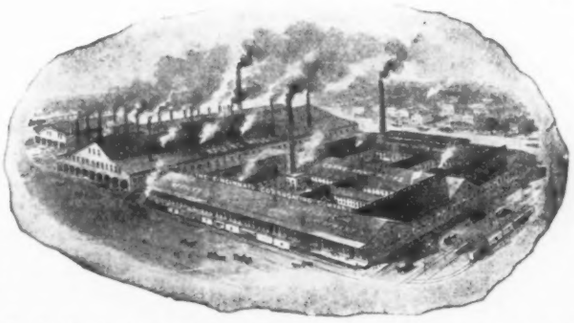
GAL. IRON



Every maker guarantees the quality of his goods—otherwise it would be impossible for him to sell again. We have two inspectors carefully examine each side of every Galvanized Sheet we make. Only perfect sheets are shipped. This is far more important to buyers than to have the avail of a guarantee. Of course we guarantee our sheets, as nothing but perfect sheets are shipped.

The U. S. Wire Mat...

The cut shows a 50 ft. roll of our Wire Matting, from which the dealer can cut any length mat to suit his customer.....

To clean your feet on a U. S. Wire Mat, all you have to do is—walk on it.
To clean the mat, all you have to do is—pick it up.

It does not curl up at the corners.
It does not hold the dirt.
It rolls up like a carpet.
It is made in all widths.

Write for our Booklet.

WM. S. SPOFFORD & SON,

Providence, R. I., U. S. A.

Be Progressive

and use Aluminum Coated Sheet Steel.

Superior in all respects to galvanized iron. It contains all its merits, with none of its defects. It is united more firmly to the base, consequently does not peel like galvanized iron. It can be heated to a red heat without destroying the coating. Sulphurous gases, brine, salt and acids do not affect it as readily as galvanized. It can be soldered with common solder. It is the only metal that will hold kerosene, gasoline and all other carbon oils satisfactorily. Give it a trial and be convinced. Prices and samples furnished on application.

Manufactured by the STEEL AND IRON METAL COATING CO., WEST CHICAGO, ILL.

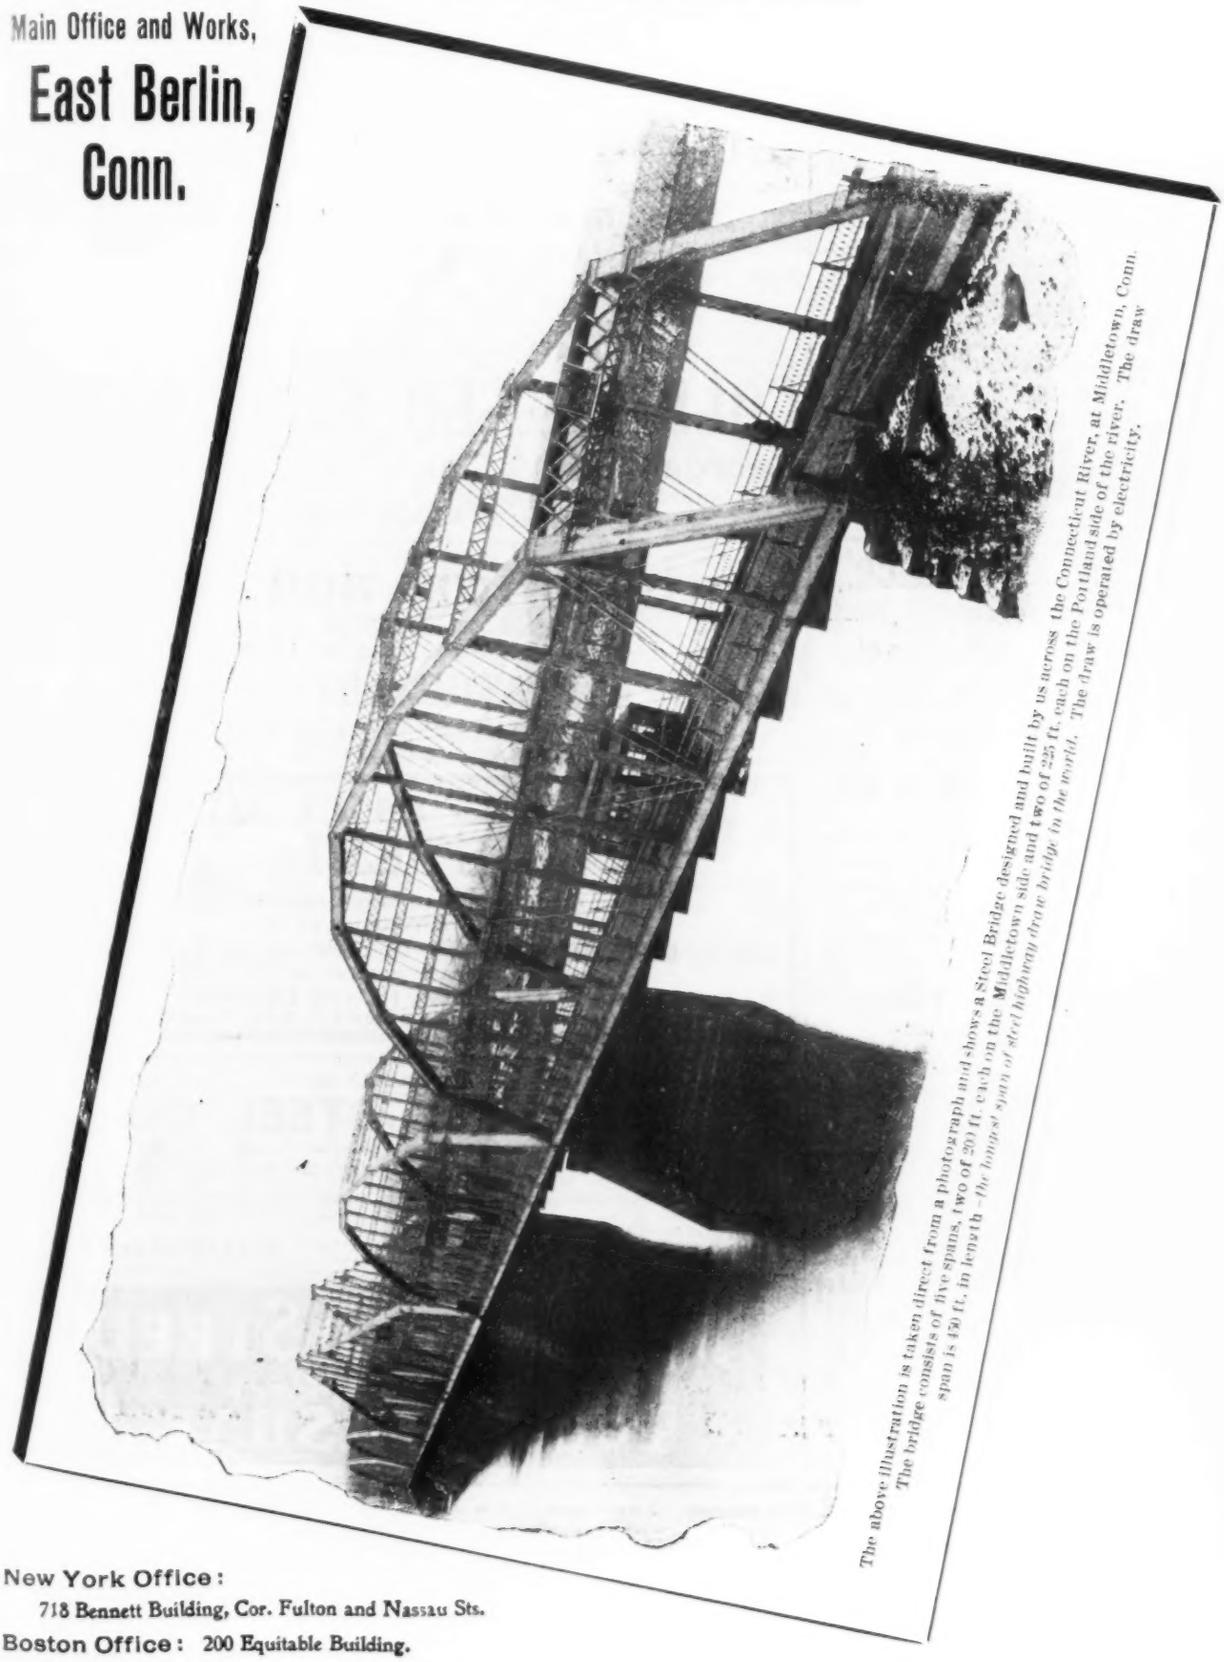
Engineers, Architects and Builders

of Steel Structures of All Kinds.

Main Office and Works,

East Berlin, Conn.



The above illustration is taken direct from a photograph and shows a Steel Bridge designed and built by us across the Connecticut River, at Middletown, Conn. The bridge consists of five spans, two of 200 ft. each on the Middletown side and two of 225 ft. each on the Portland side of the river. The draw span is 340 ft. in length—the longest span of steel highway draw bridge in the world. The draw is operated by electricity.

ATLAS METAL.

TENSILE 50,000 POUNDS.

Atlas Metal is defined by Prof. Charles James, the well-known Steel Expert, as "A New Commercial Product, standing between Iron and Steel, and uniting in itself the best characteristics of both."

ITS CHIEF POINTS ARE
GREAT STRENGTH. GREAT WEAR. UNIFORMITY. EASILY MACHINED.

HOMOGENEOUS.—Atlas Metal is not surface treated—the castings can be made of any weight, size or thickness, and the metal will be of uniform structure and entirely homogeneous throughout.

CORRESPONDENCE SOLICITED.

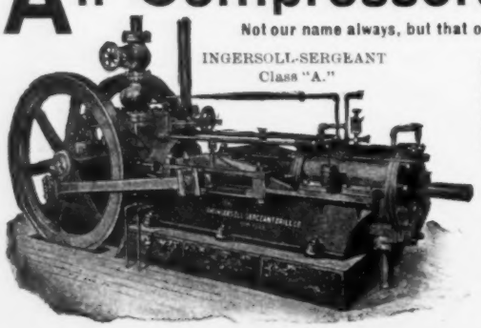
Air Compressors Catalogue No. 32.

Not our name always, but that of others to show what can be done.



INGERSOLL-SERGEANT Class "A."

The Passaic Rolling Mill, Paterson, N. J., with a monthly output of 5,000 tons of structural steel, use 40 cylinder hoists, 12 riveters, 5 drills and reamers, 2 chipping tools and other apparatus, all operated by compressed air from an Ingersoll-Sergeant Class "A" Straight Line Piston Inlet Air Compressor. The plan of distribution of air power necessitated careful engineering and close investigation of the merits of Air Compressors to secure good results. It is the high-class machine, built rigidly, embodying every detail of scientific construction, that wins in a test like this.

WE HAVE HEARD IT SAID

(By those who do not know) that our COCHRANE HEATERS and COCHRANE SEPARATORS are high priced NOT SO—anything but high priced. May be you got the idea because we keep telling you how good they are—what good things we put in them. Like well built mince pies they have a first-class casing and "INSIDES" which make them worth trying.

We don't make the cheapest heater on the market—can do it but won't. Somebody has to decide what should go in a heater. Having 13 or 14 years of experience right in this line—we've decided—and there's no skimping.

No other heater can give hotter water and better purification—is more durable or easier to clean.

Did you ever clean a heater? Not an easy matter unless it's a "COCHRANE."

Shall be pleased to hear from you.

CLEVELAND, O.

HE WENT. HE SAW. HE TUMBLED.

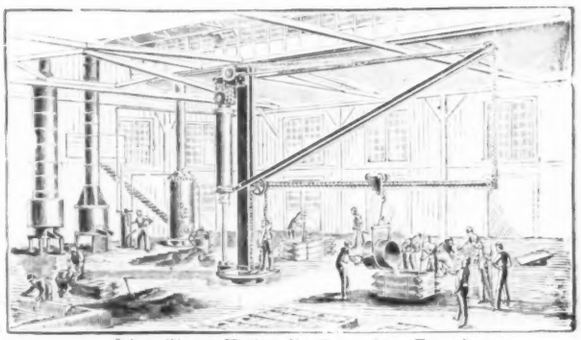
Here's part of a letter just here this week from his majesty, the President himself, of the largest —— works in the world, located in the West. Hear ye him "wunst," as they say up in Lancaster Co.

RIDGWAY & SON, Feb. 20, 1899.

Dear Sirs:—The writer has just returned from his Eastern trip, and begs to report having seen some of your Ridgway Balanced Steam Hydraulic Cranes in operation at the Foundry of Davis & Farnum Mfg. Co., Waltham, Mass., and was greatly impressed with their operation.

We had not contemplated instaling new Cranes, but since seeing your Cranes believe we can make changes to advantage in our foundry. We have a place for four Cranes. Are any of your concern contemplating a trip West any time soon? If so, please call here.

BLANK MFG. CO.,
X. Y. DASH, Pres.



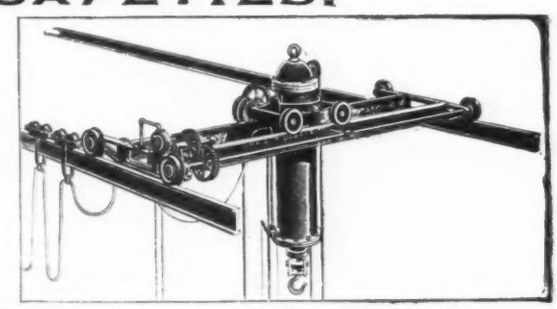
5 ton Steam-Hydraulic Crane in a Foundry.

And that's the way it would be with you also if you would take the trouble to look into the wonderful Ridgway Crane and find out a few things. The only reason you are not using Ridgway Cranes all about your works is because you don't know the machine. No Foundry, Rolling Mill, Wire Works or other plant handling heavy goods can for a day afford to be without Ridgway Cranes.

AIR HOISTS. SAFETIES.

Just seems like wasting money now to advertise these wonderful Oil Governed Hoists, for the problem with us is one of making, not selling them, since people have found out about the machine.

Yet we want you to know about them, and if you can give us a little time to get out your order, we can accommodate you If you can wait you are a very foolish man to buy any other sort of a Hoist. Cost more than other Hoists, but worth the difference a dozen times.



"Please Take the Elevator."

No Pump, Pullies, City Pressure. Just a Pipe.

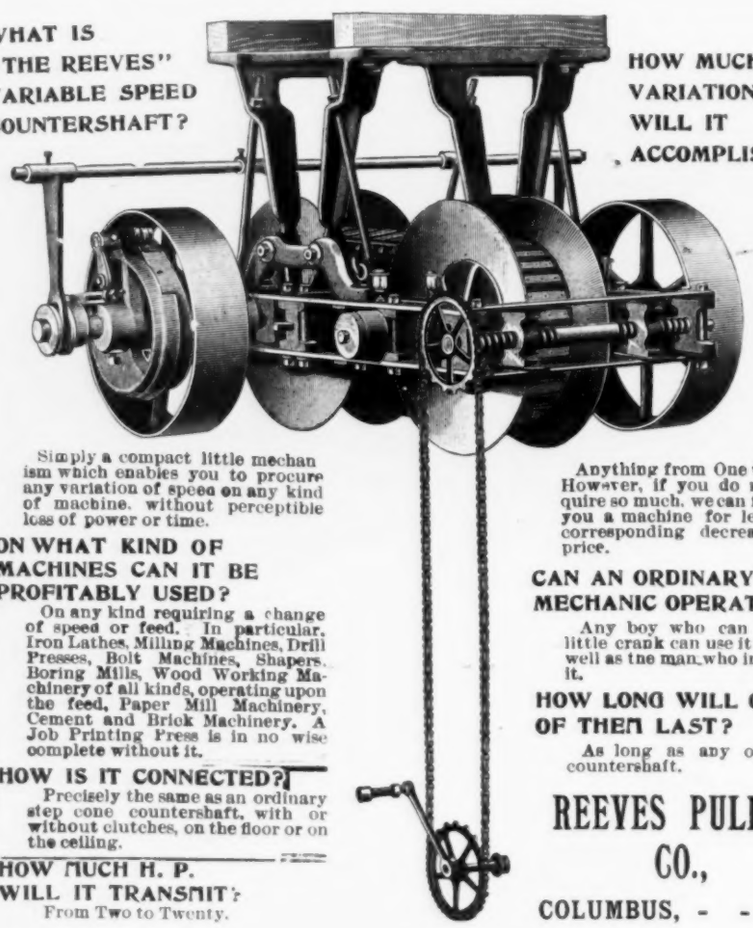
For sale by David Williams Co., 232 William St., N.Y.

WHAT IS "THE REEVES" VARIABLE SPEED COUNTERSHAFT?



HOW MUCH VARIATION WILL IT ACCOMPLISH?

Simply a compact little mechanism which enables you to procure any variation of speed on any kind of machine, without perceptible loss of power or time.

ON WHAT KIND OF MACHINES CAN IT BE PROFITABLY USED?

On any kind requiring a change of speed or feed. In particular, Iron Lathes, Milling Machines, Drill Presses, Bolt Machines, Shapers, Boring Mills, Wood Working Machinery of all kinds, operating upon the feed, Paper Mill Machinery, Cement and Brick Machinery. A Job Printing Press is in no wise complete without it.

HOW IS IT CONNECTED?

Precisely the same as an ordinary step cone countershaft, with or without clutches, on the floor or on the ceiling.

HOW MUCH H. P. WILL IT TRANSMIT?

From Two to Twenty.

Anything from One to Ten. However, if you do not require so much, we can furnish you a machine for less at a corresponding decrease of price.

CAN AN ORDINARY MECHANIC OPERATE IT?

Any boy who can turn a little crank can use it just as well as the man who invented it.

HOW LONG WILL ONE OF THEM LAST?

As long as any ordinary countershaft.

REEVES PULLEY CO.,

Send for Booklet.

The Chuck that Lasts.

The usefulness of ordinary drill chucks is ended when the jaws begin to wear, because the grip of the jaws is all that keeps the drill from slipping. It's different with the Pratt Positive Drive Drill Chuck In this chuck a positive driver holds the flat end of the drill, and makes slipping impossible. Even if the chuck jaws are not tight, the tool can't slip. The equalizing driver permits the jaws to align the drill perfectly in the chuck, and hold it true. You pay as much for ordinary chucks.

Goodell

When the GOODELL Chuck was first brought out,
The Knowing Dealer said,
That the Price was so Low, that they wouldn't go,
And he wisely shook his head.

But he has stopped shaking it. ***Why?*** Because he has found out that they ***do go;*** that they ***do work;*** that they ***do sell;*** that a Drill Chuck can be produced to sell at a ***moderate price,*** and that it ***WILL*** give ***satisfaction.***

Manufacturers who use large numbers of Drill Chucks, either as actual consumers or to equip machines which they may produce, will do well to investigate the merits of our product.

GOODELL Chucks ***never slip.***

GOODELL Chucks require no Spanners.

GOODELL Chucks are low in price.

We make them in 4 sizes, we ***warrant*** them to hold up to their extreme capacity.

Why throw away your money on the more expensive kinds?

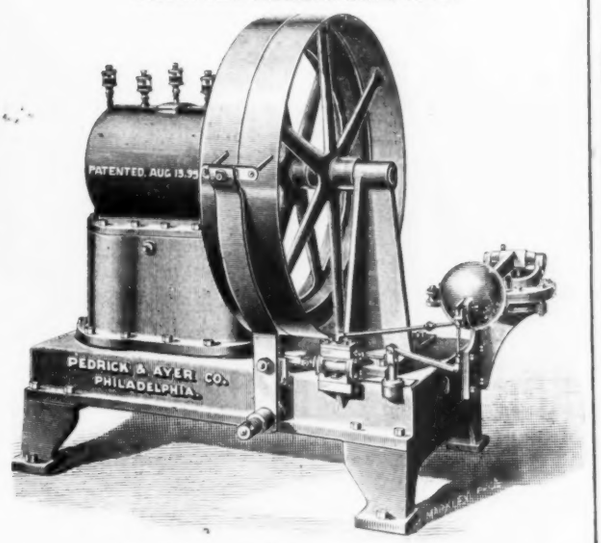
SENECA FALLS MFG. CO.,

255 Water Street, SENECA FALLS, N. Y., U. S. A.

Automatic Compound Belt Air Compressors.

PATENTED AUGUST 13th, 1895.



Straight Lift Hoist. *Built in two sizes, Nos. 1 and 2.*

No.	Size of Cylinders in Inches.	Revolutions per Minute.	Cubic Feet of Free Air	Horse Power required.	Size of Pulleys in Inches.	Shipping Weight of Compressor	Floor Space in Inches	Telegraphic Symbol
1	11x 6 6x 6	100-160	32- 50	2-3½	40x5	2875 lbs.	60x40	Parian
2	15x10 8x10	90-130	90-130	9-15	60x6	5370 lbs.	76x60	Parish

Horizontal Hoist.
Pat. Sept. 4th, 1894.

Air Hose Coupling.
For ½ inch, ¾ inch and 1 inch Hose.

These Compressors will compress more air at less cost than any other make, requiring no attention other than oiling; entirely automatic in action, stopping and starting as air is required. Specially adapted for foundry use. Can be run in series; if so, no stoppage possible.

Horizontal Air Lift for low ceilings; for general lifting; quick in action and under perfect control of operator. Straight Air Lift for foundry purposes; when equipped with retaining and releasing valve will hold the load, whether heavy or light, in the desired position, as in case of lifting a ladle of molten iron and pouring it, or raising a flask to knock out the sand. It can neither ascend nor descend as long as connected to air supply.

Air Hose Couplings are designed to do away with long lines of hose. By having suspended along the air line a number of hose equipped with this device, connections can instantly be made or disconnected, allowing one hoist to serve in different places. Each size made in duplicate. Containing a shut-off valve.

Particular attention given to making Manufacturers' Models such as Typewriters, Typesetters, Cash Registers and other models requiring great accuracy and careful design to economize the "shop cuts," and the equipment of factories with complete plants, introducing most approved watch tool methods where deemed practical and desirable for their manufacture.

WRITE FOR HARDWARE CATALOGUE.

The mechanisms are all inclosed in a dust-proof case, which cannot be opened without breaking the two seals marked *A* and *B*. The register or counter is secured by means of two bolts passing through holes marked *C* and *D*, to the machine, the operations of which it is desired to record. As the register or counter is operated by a reciprocating movement of the lever, it is possible to apply it to a large variety of machines, including printing presses, weighing machines, revolutions of engines, etc. It can be depended on for absolutely correct record.

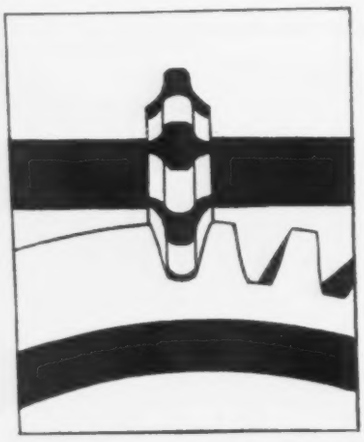
American Machinery Import office, Zurich.



A Cut Gear

is much better than a gear with cast teeth. Cut teeth are in contact at the pitch line their full length, the teeth in perfect mesh, resulting in a minimum loss of power in operating and a maximum length of life. With cast teeth it is the reverse, owing to imperfect fit and necessary increase of allowance of space between teeth.

Write us for further facts. We are practical gear cutters.

MURDOCK PARLOR GRATE CO.,
154 Boylston St., Boston, Mass., U. S. A.

The Yankee Drill Grinder

Will pay for itself more times in a single year than any other appliance you can put into your plant.

Why?

Because no tool is used so often as the twist drill.

To have a drill ground mechanically correct means, 1st, that it will cut just twice as fast as if one lip only is cutting; 2d, that it bores a uniformly true hole (a thing impossible with hand ground drills); 3d, a drill ground on our machine will bore over *twice* the number of holes without regrinding that a hand ground drill will; 4th, the life of the drills themselves will be three times as long as if ground by hand. Stop and think whatall this means to you.

It grinds both flat and twist drills, has the greatest range of any grinder made—from 1/8 to 2 1/4 inch drills—and is the *only* grinder giving any clearance desired. We guarantee it to be the best machine for the purpose in the world.

In use in hundreds of the largest concerns in the country. List of users and testimonials gladly given.

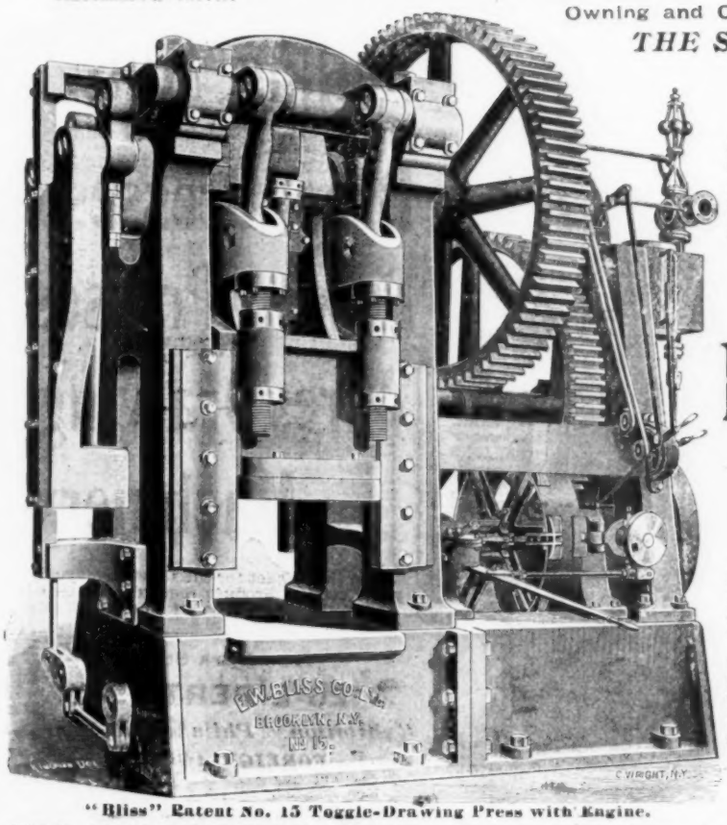
THE STILES AND PARKER PRESS CO.



"Bliss" Patent No. 15 Toggle-Drawing Press with Engine.

HEADQUARTERS FOR

SHEET METAL TOOLS

For all operations in Punching, Drop Forging, Drawing, Stamping, Embossing, Wiring, Bending, Forming, Double Seaming, etc., etc.

DROP HAMMERS, SHEARS, DIES and PRESSES

Correspondence Solicited. Estimates Furnished.

"Bliss" Pat. Toggle-Drawing Press NO. 15.

This press is designed for the heaviest class of drawn sheet metal work. It is much more compact and substantial than presses hitherto put on the market for similar work—more easily adjusted, and operated with less expenditure of power. The wear is reduced to a minimum through the application of our toggle mechanism, which also insures a more perfect dwell of the blank-holder than can be maintained in "Cam" Drawing Presses. The movements of this press are under perfect control through the hand lever shown, which actuates a powerful friction clutch and brake. Its weight is 150,000 lbs.

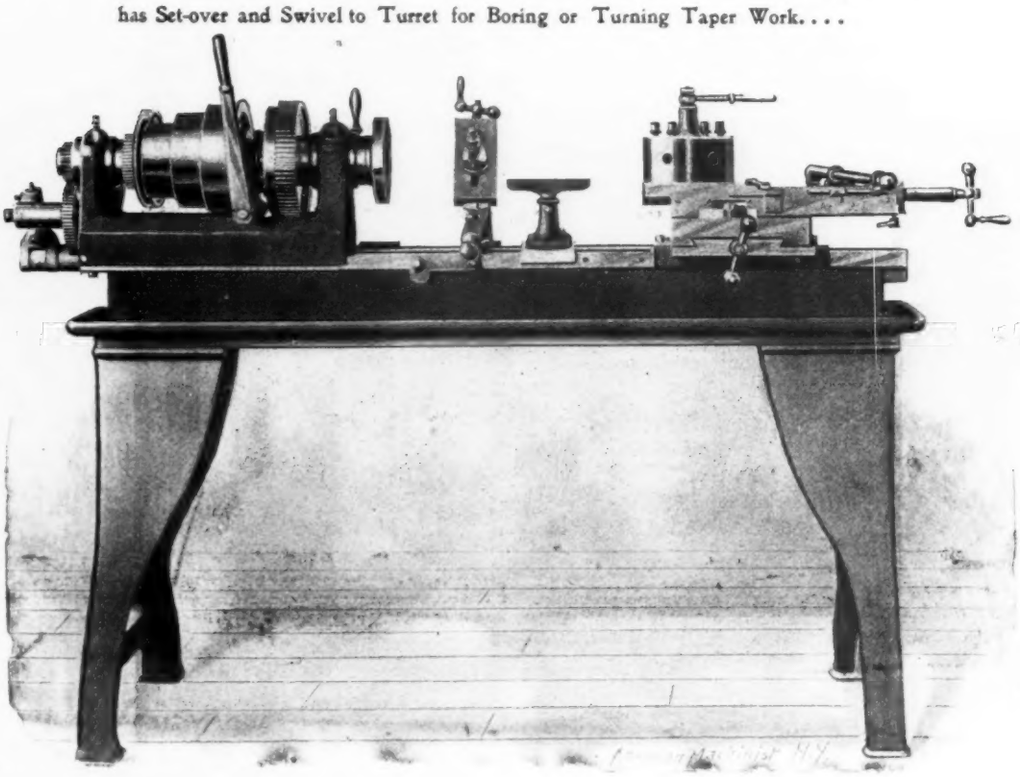
WRITE FOR PARTICULARS.

MACHINERY FOR BICYCLE & ELECTRICAL WORK.

This is our **15" Universal Monitor** for working Brass.

It has Friction Back Gears for Changing speed instantly, Chaser for Threading, and has Set-over and Swivel to Turret for Boring or Turning Taper Work....

We Have Plain Monitors, Brass Finishers' Lathes, Chucking Machines, and Screw Machines.



We Make Turret Machines Exclusively.

FOR SALE CHEAP.—Improved water power, 100 horse power, for the manufacture of all kinds of fruit packages, or for novelty works articles made of wood. Nearly 700 carloads of grapes were raised and shipped within a radius of ten miles of here last fall. The fruit packages for this amount to $45,000. This is the banner county in the state for grapes. We also raise cherries, berries, pears, peaches, currants and apples for shipping. The fruit interests here are enormous and are growing wonderfully every year. The fruit growers want a basket package factory here. The timber is here in abundance and cheap nearby. A good chance for a hustling man. A large building and dwelling are on the premises. We are situated in South Western Michigan, 30 miles from Lake Michigan, 125 miles from Chicago, with good shipping facilities. For further particulars write owners, G. W. TYLER & CO., Paw Paw, Michigan.

FOR SALE.

CLEAN STOCK OF HARDWARE and Stoves in North Central Kansas; well established and doing fine business; invoice from $13,000 to $14,000. Will be sold at a bargain for cash or will take some clear land or give time on part of purchase price. Address TICE & WILSON, Beloit, Kansas.

In the matter of

—THE—

Londonderry Iron Company, Ltd.

MONTREAL.

(In Liquidation.)

The undersigned, by order of Hon. Justice Curran, dated 17th February, 1899, is authorized to offer for sale the various properties and plants belonging to the said Company, situated at or near Londonderry, N. S., consisting of about 30,000 acres of selected mineral lands held in fee simple, free of royalties, with blast furnace, coke ovens, rolling mill, pipe and general foundry, machine shop, about twelve miles of railway with rolling stock, numerous houses, and all the plants incidental to the production of iron on a large scale.

The lands carry a large quantity of timber, and are traversed by considerable streams, upon which are many water powers.

The property will be sold subject to existing leases, and tenders will be received by me at my office as under, where full inventories, plans, etc., can be seen on application.

GEORGE CREAK, C. A.,
Liquidator.

12 Bank of Toronto Chambers,
Montreal,
18th February, 1899.

HERO STAMPING WORKS,

Room 407, Cuyahoga Bldg., Cleveland, O.

Locations for Industries.

The Chicago Milwaukee and St. Paul Railway Company has all its territory districted in relation to resources, adaptability and advantages for manufacturing, and seeks to secure manufacturing plants and industries where the command of raw material, markets and surroundings will ensure their permanent success.

A number of new factories and industries have been induced to locate—largely through the instrumentality of this company—at points along its lines.

The trend of manufacturing is Westward. Confidential inquiries are treated as such. The information furnished a particular industry is reliable.

Address

LUIS JACKSON,
Industrial Commissioner, C., M. & St. P. R'y.
Old Colony Building, Chicago, Ill.

FOR SALE, or WOULD LET.

FOR SALE

Bessemer Plant and Blooming Mill

of the North Branch Steel Company.

Plate Mill For Lease

SITUATED AT : : : : DANVILLE, PA.

The Steel Plant is entirely new and practically ready for operation; it contains two 5-ton vessels and a 32-in. reversing Blooming, Slabbing and Billet Mill. If desired, its 28-in. Plate Mill, which is situated only a short distance from the Slabbing Mill, could be leased.

Danville is on the line of the Catawissa Branch of the P. & R. R. R. and the Bloomsburg Branch of the D., L. & W. R. R.; is directly across the river from and connected by bridge with South Danville, through which a branch of the P. R. R. runs, and is within 12 miles by rail of Northumberland, through which the Northern Central Branch of the P. R. R. passes.

There is a good home market for a part of the product of the above plant, and the starting of it up would make Danville an excellent location for a Tin Plate Works. Full information may be obtained of

THE NORTH BRANCH STEEL COMPANY,
25th St. and Washington Ave., - PHILA., PA.

CARPENTRY AND BUILDING
Series No. 2.
Modern American Dwellings
With Constructive Details.

The Most Elaborate and Complete Volume of Plans Ever Brought Out for the Use of Architects, Builders and Home Seekers.
BY NUMEROUS ARCHITECTS.
A selection of thirty-seven designs of artistic suburban dwellings erected in various sections of the country, at a cost ranging from $2,000 to $5,000, and embracing floor plans, elevations and constructive details showing interior and exterior finish, all drawn to a convenient scale, together with brief extracts from the specifications.
Those who contemplate building a home will find this volume of great value. In connection with each design is given the necessary floor plans, elevations and constructive details as will enable any practical builder to execute the work. The plans are diversified in both the interior arrangement and external appearance, and will afford to persons of various requirements an opportunity to select a home suited to their taste and convenience.
33 Half-Tone Engravings. 127 Full Page Plates of Elevations, Floor Plans and Constructive Details.
40 Pages of Descriptive Text. Size 9 x 13 in. (oblong), Handsomely bound in cloth. PRICE $2.00.

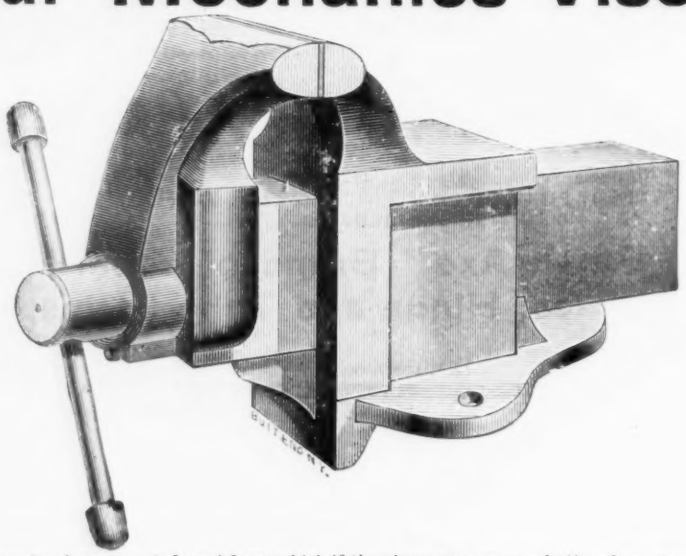
Our Mechanics' Vises.



These vises have inserted steel faces which if they become worn or battered can be removed and new ones attached without trouble.

The screw is fastened by a nut at the rear end, which is not only a substantial method but any wear can be taken up and thus save lost motion. The Vises have worked their own way into market and both the domestic and foreign demand for them is now good. There are no cheaper Vises made, the quality considered.

IMPORTANT DECISION RELATING TO THE

HEINISCH

TRADE-NAME ON SHEARS, TRIMMERS, &C.

The U. S. Circuit Court, Southern District of New York, Judge Townsend, has rendered a decision in the suit of "R. Heinisch's Sons Co. vs. Hermann Boker & Co."

"The Complainant is entitled to an accounting, and to an injunction restraining them from using the names 'Heinisch' or 'H. C. Heinisch' on its Shears, Labels, etc., and otherwise, in any way which will interfere with Complainant's enjoyment of the benefits of its Trade-name."

Referring to the above decision we would respectfully state our determination to protect our rights in the premises and warn all persons against any imitation of our Trade-name.

Cloth.....$1.00

For sale by David Williams Co., 232 William St., N.Y.

PEARCE'S IMPROVED CAHOON PATENT BROADCAST SEED SOWER

Is as much superior to any other device for sowing grain as the modern electric light is better than a tallow candle. The CAHOON is not the lowest price seed sower, but taking into consideration the durability of the machine, the ease with which it is operated, and the quality of its work, it is the cheapest. Pays for itself every day that it is used. Sows all kinds of grain and cleaned grass seed; does five times as much work as can be done by hand with two-thirds the amount of seed, and does it better than it can be done in any other way.

Dealers who handle the CAHOON make a profit and a satisfied customer at the same time. They stay sold. A prominent hardware dealer in the South wrote us under date of Feb. 13, '99, "We are not handling any other broadcast seeder similar to yours. Tried this some years ago and got enough of it."

Retail dealers supplied at factory prices promptly by our wholesale agents at all principal distributing points.

McIntyre's

Dry Battery Portable Electric Safety Lamp...

This is an Electric Lamp set in a White Enamel Parabolic Reflector, and can be attached to the cap or any part of the clothing by means of a stick-pin attached to reflector and connected to the battery with a flexible cord. The battery is arranged to be carried on a belt or in the pocket. So the user has free use of hands. The current can be turned off when not in use. Dry batteries are used and can be recharged from direct Incandescent Electric Current Charger and full directions go with each Lamp.

IS USED BY THE FOLLOWING: For Watchmen, Miners, Mine and Gas Inspectors, Boiler Shops, Oil and Gas Works and Gas Fitters, City Sewer and Underground Cable Inspectors; Powder Mills and Warehouses where explosive materials are manufactured and stored; exploring cellars and trenches where leaks occur, and investigating pipe connections where it is impossible to carry an oil lamp or candle for fear of explosion—and all parties requiring a safe portable light. The whole outfit is neat and compact.

No. 1 weighs 2 lbs., 1½ C. P. Price complete, $4.00. For Meter Reading Only.

No. 2 weighs 3 lbs., 4 C. P. Price complete, $6.00. For General Use.

No. 3 weighs 12 lbs., 10 C. P. Price complete, $12.00. For Several Persons to Work By.

Manufactured by...

Why is C. E. Jennings' New Auger Bit No. 1½ the Best Bit for Wood Boring in the World? Because

It Bores Equally Well in Hard or Soft Wood, Cross Grain or End Boring. . . .

There are good bits made for **hard wood.** The L'Hommedieu Ship Bit is an excellent tool for this purpose, but it is not designed for fine cabinet work or soft wood. There are good Bits for Soft Wood, but fail when used in **hard wood.** We have combined two principles in one, and think we have solved the problem of putting a bit on the market that is suitable for all around use Price-lists and samples furnished on application.

LIBERAL DISCOUNT TO THE TRADE.

MOST perfect knife sharpener made. Easily operated and quick work. The degree of perfection attained by the use of this machine is far superior to that accomplished by the ordinary method of hand work.

These machines are practical, based on correct mechanical principles and have reached their present state of perfection after many years of experimenting.

They are simple in their construction, very durable, and sharpen with great rapidity. Knives keep their proper shape and last much longer when sharpened with the "Universal" Machine. Silver-plated knives can be sharpened without damaging the blade.

Every dealer and every family should have one of these machines.

We guarantee the "Universal" Machine to be as we represent it, practical, convenient and perfect.

FITCH SASH LOCKS.

(Patented July 21, 1896; Aug. 24, 1897.)

By reason of their conspicuous merit, have won a recognized place among the staples of Builders' Hardware.

Repeated endorsements by representative Architects and Builders everywhere insure a ready sale by the Hardware Dealer.

A Sash Lock to be "good for anything" must securely lock a window. The Fitch Sash Locks do much more: Adjust the meeting rails—taking up the sag to stop all rattle—automatically drawing the two sashes together; and prevent disfigurement of the top sash—keeping the window "locked or unlocked." Strong, well made and durable. Styles "ornamental" and "plain"—all finishes.

Give them a trial. Small and large sizes in all finishes. Catalogue and price on application. Sample Free.

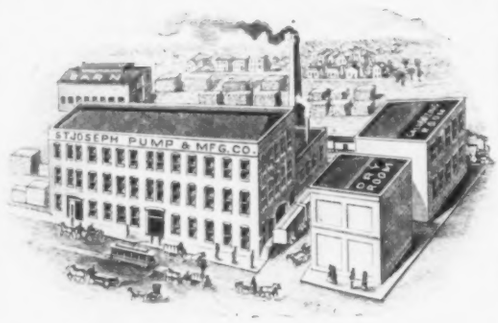
ASK YOUR JOBBERS FOR

THE PERFECTION WATER ELEVATOR AND PURIFYING PUMP.

And take no SUBSTITUTE or the "something just as good."

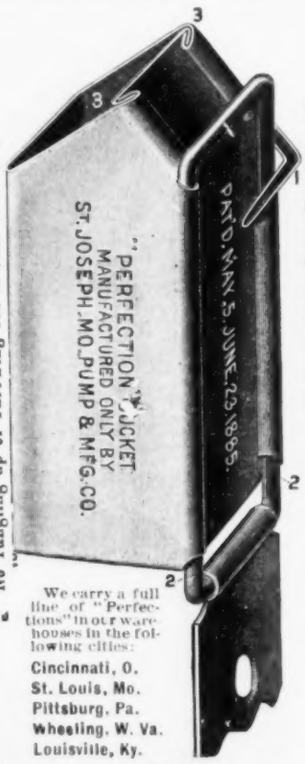


ESTABLISHED 1886 REBUILT 1895
OFFICE & WORKS: GRAND AVE. FROM 8TH TO 10TH STS.

Perfect in Name
Perfect in Nature

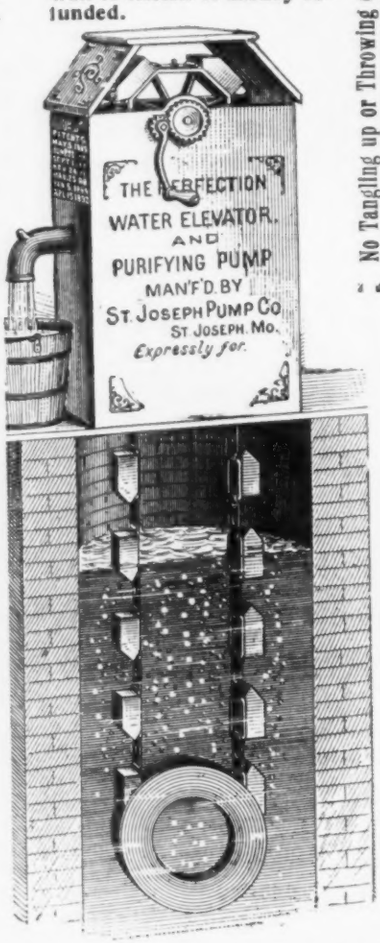
Received Highest Award and Gold Medal in competition with the world at the great Trans-Miss. Exposition in 1898. For 13 years the leader and will always continue.

Guaranteed to purify the **FOULEST WATER** in **any well** or cistern or **money refunded.**



No Tangling up or Throwing out of Bottom Wheel.

No Soldering Leaky Cups, being Galvanized after Construction.



We carry a full line of "Perfections" in our warehouses in the following cities:

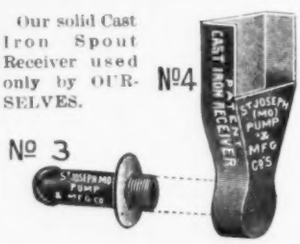
Cincinnati, O.
St. Louis, Mo.
Pittsburg, Pa.
Wheeling, W. Va.
Louisville, Ky.

Some Jobbers and Manufacturers will offer you goods saying they are just as good as the Perfection. Why, because their profit is greater on the "Just as good" article; but do not be fooled or deceived.

Celebrated and World Renowned on Account of Its Perfect Qualities.

There may be other elevator pumps, but not one of them can compare with the "Perfection." Our one piece steel bucket, folded together by double lap seams (see cut) and connected with our corrugated steel flat sprocket link (true running), both galvanized after construction, makes a chain that will last a natural lifetime. Our curbs are decorated handsomely and are superior in material, workmanship and finish to anything on the market. Our fixtures are extra heavy, and including our solid cast iron bottom wheel, and our latest improvement, namely, our solid cast iron combination spout and receiver (a feature no other elevator has), makes our pump, as its name implies, "Perfection," and sold at about the same price as inferior goods.

Our solid Cast Iron Spout Receiver used only by OURSELVES.



Guaranteed to be

Non-Freezable in the Coldest Climates.

Send all orders direct to St. Joseph, Mo.

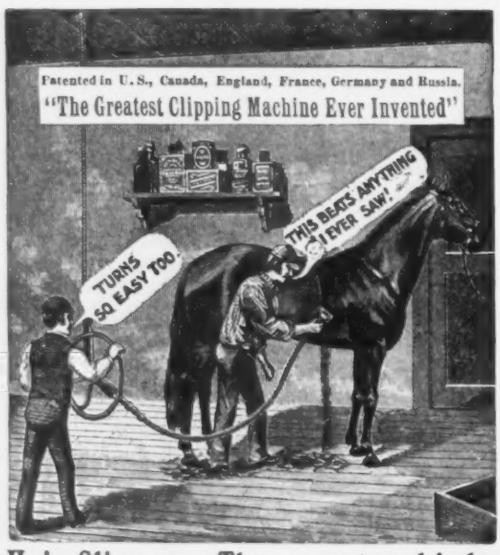
"SEE THE HAIR FLY. NOW IS THE TIME"



Hair Clippers. There are two kinds—

"Hair Clippers" and "Hair Pullers." If you want "Hair Pullers" ask for "any old kind." If you want "Hair Clippers" insist on the "Stewart Patent." There's no other "just as good." They will cost you no more than the "inferior kind." Each part is absolutely interchangeable; each Clipper is warranted to cut perfectly. We have just been awarded Gold Medal at Trans-Mississippi Exposition, highest and only award for horse clipping, sheep shearing, and cattle grooming machines.

For the New '98 Chicago Clipper.

Retails for $8.75.

"Known the world over" as the "Greatest Clipping Machine ever invented." Patented in the United States, Canada, England, France, Germany and Russia. Holds World's record for fast horse clipping. Time, 14 minutes. All enterprising hardware men can sell this machine in place of the old fashioned two-hand variety. Can be set up in one minute in any place by any one. Thousands of testimonials from well satisfied customers. Weight of machine, 35 pounds; boxed, 55 pounds. The day is gone by when a man will spend half a day clipping a horse when it can be done w th the new '98 Chicago Clipper in as short a space as 14 minutes. Get in line. Send for a catalogue.

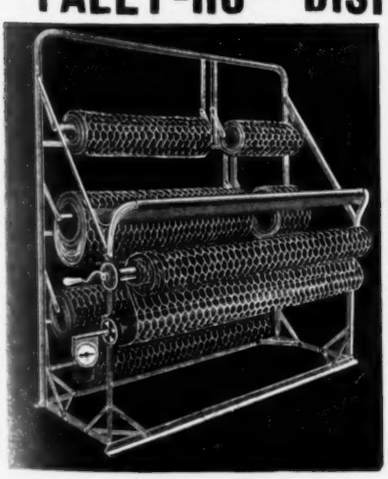
"TALLY-HO" DISPLAY RACK AND MEASURING MACHINE



PATENT ALLOWED.

Arranged for conveniently measuring, winding and handling **POULTRY NETTING**

The MEASURING AND HANDLING OF POULTRY NETTING has been a most trying and vexatious problem. The "TALLY-HO" has solved the long vexing question of how to measure the stubborn stuff. It is needless to enter into the details of all the disagreeable annoyances attending the retailing of an article that is growing in demand each year. You know what they are, and a description of the machine will show you that they are all overcome and that the selling of any number of feet, of any width, can be done in a few minutes by one person with pleasure instead of trial and trouble.

The machine is made of GALVANIZED IRON, occupies only 28 INCHES by 80 INCHES floor space and is 70 INCHES HIGH, and holds one bale each 12, 24, 36, 48, 60 and 72 inch netting.

ITS CONSTRUCTION is on STRICT MECHANICAL PRINCIPLES, and with ordinary usage it WILL LAST A LIFE TIME.

It winds the netting compactly while measuring, and the rolls are easily tied and ready for delivery.

It provides a place where netting is always in view, and makes a display of what under the old way is a ragged looking lot of cut pieces always in the way.

It saves much waste in taking care of small pieces. It saves time and the annoyance of carrying the bales out to the street to cut and measure.

IT IS GUARANTEED to do the work claimed for it, and embodies every need for rapid and easy handling of poultry netting.

These are facts that will merit and command your attention.

YUKON Refrigerators.

ARTHUR BRITTAN & CO.,
136 Lake Street, - - Chicago,
General Sales Agents.

The Yukon combines all the best points of the best makes with several new features, which makes it the best Refrigerator on the market.

The Yukon is made in two styles, with ***Removable Flues,*** and with the ***entire Ice Chamber Removable.***

We note some of the excellent features of the Yukon:

Thoroughly seasoned ash lumber.
Elegance of finish.
Carved panels.
Swinging and removable base board.
Solid bronze hardware, Roman gold finished.
Zinc lined. Patent casters.
Galvanized iron flues, ice rack and shelves.

The shelves being so constructed that small dishes placed upon them will not tip over.

Patent Trap, connected with waste pipe in bottom of provision chamber, where it is most accessible, both trap and waste pipe being easily removed, cleaned and replaced, without a back-breaking process or poking with a stick.

The insulation used is ***Granite Rock Wool*** and Charcoal Sheathing.

Buy the Yukon and you will have the best Refrigerator made as well as an elegant piece of furniture.

THE TOLER
Liquid Door Check and Spring.

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective**, giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.

Regular finish, Gold Bronze No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

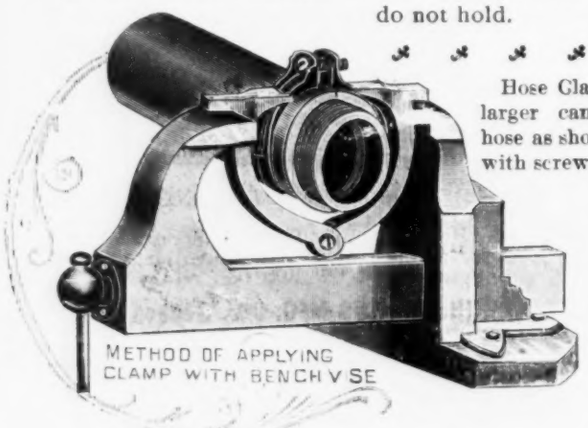
A CURE FOR LEAKY HOSE

is for the dealer to order all hose coupled with ***SHERMAN CLAMPS,*** as that will remedy many leaks that come from wire bands that stretch or cast clamps that break and do not hold.



Hose Clamps 1 in. and larger can be put on hose as shown in cut, or with screw driver alone.

Small sizes ½ and ¾ in. for lawn hose are applied to hose with screw driver alone.

SOLD BY ALL JOBBERS.

Established in 1808.

GLIDDEN'S METALLIC REPAIR OUTFIT

The one that has the Hinged Plugs.

THIS is the smallest, neatest, most compact and practical repair outfit ever offered to the public. Complete in a tin box 1½ inches long, 1 inch wide and ¼ inch thick. It will repair a puncture at once, without the use of cement, and any woman or child can use it. The plug is made of metal with a **hinged head, which can be forced into a much smaller opening than one with a stationary head.** Two sizes of plugs are furnished with each kit, which will fit ordinary punctures; also a cutter is furnished, to be used when the puncture is too small to admit the plug.

Directions for use. Place the flat plate of the plug so it will be loose on the key. Screw the key into the plug and insert into the hole, leaving the flat plate on the outside of tire. Draw back the key so that the plug will rest flat on the inside of the tire. Screw the flat plate to plug with wrench (left hand thread), and turn key to right. Remove the key by turning to left, and you have a permanent repair which does not injure the tire or its looks.

DISCOUNT TO THE TRADE, ASK YOUR JOBBER FOR IT.

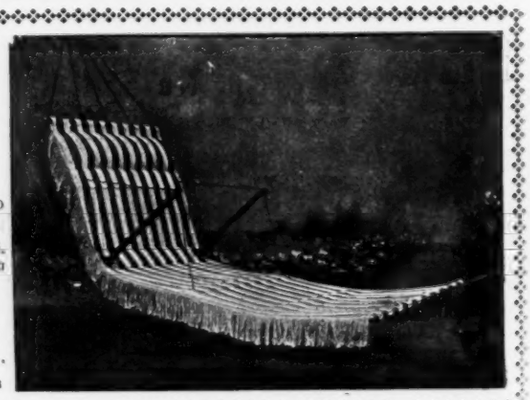
"Hann Automatic" Grass Catchers



SATISFACTION MOST COMPLETE.

ST. LOUIS, MO., December 30, 1898.

GENTLEMEN:—I have just returned from a four months' hunting trip through Montana and Idaho, during which I had occasion to use over 3000 "NEW VICTOR" shells loaded with KING'S SMOKELESS, in my 10 and 12 gauge shotguns at geese, ducks, chickens, blue grouse, sage hens and other game under many varying conditions, constituting altogether a tolerably fair test, and it is a pleasure to state that my satisfaction with this ammunition is most complete, my last experience with it confirming the opinion I formed after using a limited quantity on quail in this State. I found the Victor shells unfailingly reliable—not one miss-fire did I have—of astonishing quickness and possessing a deadly killing quality to a superlative degree, and altogether the best shotgun ammunition I have used in 30 years' experience. I take little interest in trap shooting, but the experience of some of my friends at the trap with Victor shells is in line with mine in the field.

I am, gentlemen, very truly yours,

To F. B. CHAMBERLAIN COM. CO., St. Louis, Mo. (signed) ED. WYMAN.

Thousands of sportsmen endorse

the above, and state that King's Smokeless Powder in Peters "NEW VICTOR" shells is a combination that "can't be beat."

CLEVELAND BICYCLES

STANDARD VALUES.

The Line that Brings Success to the Dealer and Satisfaction to the Rider.

WESTFIELD	styles 3-4 for men and women; a thoroughly well built and attractive bicycle at a low price; the lightest low-priced wheel on the market; finished in standard black and "Westfield blue," with gold stripe; detailed information on application.	
CLEVELAND	styles 61-62, for men and women; Cleveland quality throughout; Burwell dust-proof, self-oiling bearings; Burwell tires; Cleveland hardened block and pin chain—features of excellence that cannot be found with any other line. We believe this bicycle to be the best value on the market at this price.	$50 00
CLEVELAND	Chainless, styles 73-74, for men and women; Sager gears and bearings; the type of chainless on which the wonderful '98 records were made by "Major" Taylor; Burwell tires are regular equipment with these patterns.	$75 00
CLEVELAND	Roadsters, styles 66-67, for men and women; Burwell Ball and Roller Bearings dust proof and self-oiling; new hubs with "belt bearing" spokes; Burwell tires, and other distinctive features. The bicycle best adapted for all-round service.	$75 00
CLEVELAND	Special Light Roadsters, styles 64-65, for men and women; the only bicycle on the '99 market that is **entirely new**. All Cleveland features are shown in these patterns; weight 21-22 lbs., depending on equipment.	$75 00
CLEVELAND	Racer, style 68, designed especially for speed; equipped, if desired, with the new Burwell racing tires, 1⅜ inch; the best all-round tire for racing purposes that has yet been perfected; weight 19 lbs.	$75 00
CLEVELAND	style 69, 30-inch wheels, 23-25 inch frame; especially recommended for tall men; is remarkable for easy running on rough roads. All our improvements for the season of '99 are shown with this pattern.	$75 00

We invite correspondence from Bicycle Dealers seeking connection with a house whose goods are dependable and whose policy is well established.

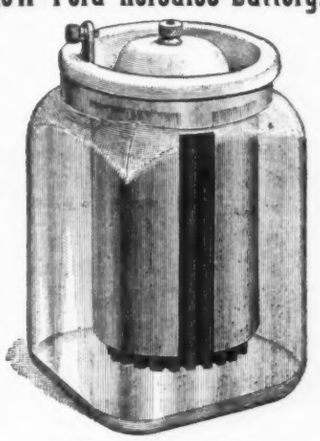
New Peru Hercules Battery.



THE VERY BEST.
The circular zinc which surrounds the carbon is attached to the top in such a manner that it cannot come in contact with the carbon, making a short circuit impossible.
The carbon is hollow and is filled with a depolarizing compound. It has a fluted outside surface and has an E. M. force of 1.47 volts.
Sold in case lots of fifty. Write for prices.

ACTUAL SIZE.

DO THIS ! ! !

Put some

Veeder

Cyclometers in stock. They are as useful as a watch. One measures distance, the other time—both are essential factors of every business or pleasure trip. To every cyclist the Veeder Cyclometer is a necessity.

Made for 24, 26, 28 and 30 in. wheels.

Its merit has eliminated competition —90% of modern cyclometers are Veeder Cyclometers.

Booklets Free.

VEEDER MFG. CO.,
Hartford, Ct., U. S. A.

ACTUAL SIZE.

Price, **$1.00.** 10,000 miles and repeat. *Dust-proof, water-proof, positive action.* Parts cannot become disarranged. Cannot register falsely unless actually *broken*. No springs. No delicate parts.

"Trip" Cyclometer. Price, **$2.00.** The small indicator can be set back to zero, *like a stem-setting watch*, after each trip without affecting grand total on the large register. Same positive action as the other famous model.

JUST PUBLISHED.

A Manual of Practical Methods of Repairing Bicycles.

By S. D. V. Burr.

Fourth Edition, Revised and Enlarged.

Cloth Bound. 208 Pages. 205 Illustrations.

THE BICYCLE is treated as a machine composed of many parts, each of which may be damaged to a greater or less extent. Each injury to each part is discussed fully, and the best methods of making the necessary repairs are explained thoroughly. The treatment of assembled parts, in such operations as brazing, nickel plating, enameling and the like, is described in detail.

Almost every topic is illustrated with one or more original engravings.

The book deals with the simplest and most useful appliances for repairing. It is in every way practical. It is recommended not only to manufacturers of bicycles, but more particularly to all those who handle bicycles, whether as dealers or repairers.

Price, Post-paid, One Dollar.

"Small Talk About Business."

By A. E. RICE.

A Banker's Business Hints for Men and Women.

A bright man, with his wits about him, is often described as "All Business." Being "all business" is knowing how to do the right thing the right way.

Do you want to be "all business?" The book tells. The wrong way wastes money and wastes time. Where is the good of that? The book tells nearly everything that an enterprising business man ought to know. Everything in it is worth knowing.

The book is called "Small Talk About Business." It is full of money-saving talk for old and young, for men and women, for business-like and unbusiness-like people. YOU ought to have it.

Price, 50 cents. 120 Pages. Elegant Cloth Binding.

DAVID WILLIAMS CO., Publishers and Booksellers, - 232-238 William Street, New York.

Shovels AND Spades.

Our Shovel Blades are of the best crucible steel, guaranteed equal to any on the market and superior to most; especially adapted for Railroads and Contractors. The Handle of both these and the Ditching Spade in the first grade quality is from selected second growth close grained White Ash grown on high ground. Many makers use timber cut from swamp or low land growth, the grain of which is open and quality therefore inferior. Our Ditching Tools are of the best Steel, differing only in the various grades, made and shaped by the use of charcoal fires giving them the peculiar temper and strength requisite in such tools; this, together with the shape and finish of these goods, enables us to give the consumer a tool that will do twice the work of an ordinary Drain, Post or Ditching Spade.

NORTH AMERICAN METALINE CO., 43 Third St., Long Island City, N. Y.

Gentlemen: Your favor of 20th inst. received; in reply are pleased to say that your Metalined Bushings have given us entire satisfaction. We first applied them in 1886 or '87 under very trying conditions, put them in fast running loose pulleys with high tension belt, and they gave perfect satisfaction. Since then, we have extended their use throughout our works, and they have given satisfaction wherever we have placed them. Very truly yours,

JAS. PYLE & SONS.

New "Cold" Process of Galvanizing.

In use for more than two years with best and absolutely satisfactory results. Articles that cannot be galvanized by any other process, such as screws, nuts, cutting instruments, tools of every description, springs, locks, artistic metal articles, can be galvanized in a superior manner by this process. The multitude of articles that can be galvanized is without limit. Uniformly smooth surface is preserved, thickness of coating can be regulated, saving of spelter about 80%, besides many other advantages. *We grant licenses for territory, also shop rights on royalty basis.*

Fulton Engineering & Ship Building Works

Not responsible for delay or non-fulfillment of contract when caused by strikes, acts of God, fire or other unavoidable causes

San Francisco Sept. 29/98.

Hoyt Metal Co.,
St. Louis, Mo.
Gentlemen:-

Reporting on the merits of the Nickelehe Babbitt Metal, we have used a large quantity of it with the most satisfactory results. It has given better satisfaction than any other babbitt metal we have used, including all the standard brands, particularly for electric and marine engine bearings where it is subject to the severest duty.

We will be pleased to give you or others the names of steamers using it, also the names of their engineers and owners to whom any one can write. Without exception we believe, that all will speak favorably of it and from our own experience with it and other metals we decidely recommend it.

Very truly,
FULTON ENGINEERING & SHIP BUILDING WORKS.

Dict. by J. S. Sr. *James Speirs Pres*

YOU WILL SEND US AN ORDER.

Nickelene, although very hard, is so tough that it can be hammered to a knife edge.

Nickelene is being used by many in place of Phosphor Bronze.

Nickelene can be melted in an iron ladle or kettle, and at a little higher temperature than that necessary for melting Babbitt Metal, runs freely and makes a good casting.

NICKELENE IS THE BEST BABBITT METAL IN THE WORLD.

WRITE US FOR PRICE.

The above illustration is taken direct from a photograph and shows the interior of a building designed and built by us for the Link Belt Engineering Company, at Nicetown, Philadelphia, Pa. The building is 71 ft. in width, 180 ft. in length, divided into two parts, that shown in the illustration being controlled by a traveling crane. The walls are of brick, the roof being covered with corrugated iron, thus making the building absolutely fire-proof.

ATLAS METAL.
TENSILE 50,000 POUNDS.
Atlas Metal is defined by Prof. Charles James, the well-known Steel Expert, as "A New Commercial Product, standing between Iron and Steel, and uniting in itself the best characteristics of both."
ITS CHIEF POINTS ARE
GREAT STRENGTH. GREAT WEAR. UNIFORMITY. EASILY MACHINED.
HOMOGENEOUS.—Atlas Metal is not surface treated—the castings can be made of any weight, size or thickness, and the metal will be of uniform structure and entirely homogeneous throughout.

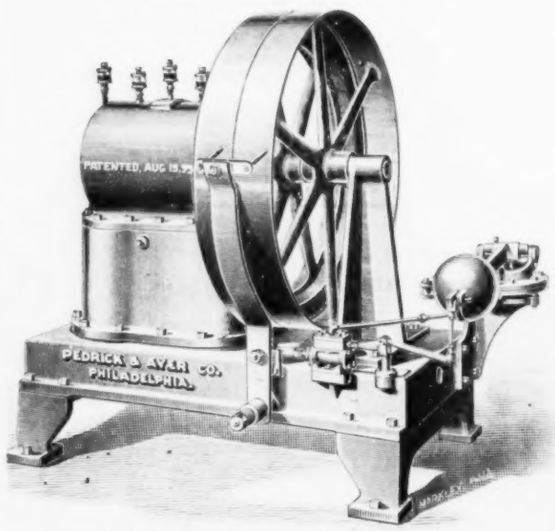
Straight Lift Hoist.

Automatic Compound Belt Air Compressors.

PATENTED AUGUST 13th, 1895.



Built in two sizes, Nos. 1 and 2.

No.	Size of Cylinders in inches.	Revolutions per Minute.	Cubic Feet of Free Air	Horse Power required.	Size of Pulleys in inches.	Shipping Weight of Compressor	Floor Space in inches	Telegraphic Symbol
1	11x 6 6x 6	100-160	32- 50	3-8	40x5	2875 lbs.	60x40	Parian
2	15x10 8x10	90-120	80-120	9-15	60x6	5350 lbs.	76x60	Parish

Horizontal Hoist.
Pat. Sept. 4th, 1894.

Air Hose Coupling
For ½ inch, ¾ inch and 1 inch Hose.

These Compressors will compress more air at less cost than any other make, requiring no attention other than oiling; entirely automatic in action, stopping and starting as air is required. Specially adapted for foundry use. Can be run in series; if so, no stoppage possible.

Horizontal Air Lift for low ceilings; for general lifting; quick in action and under perfect control of operator. Straight Air Lift for foundry purposes; when equipped with retaining and releasing valve will hold the load, whether heavy or light, in the desired position, as in case of lifting a ladle of molten iron and pouring it or raising a flask to knock out the sand. It can neither ascend nor descend as long as connected to air supply.

Air Hose Couplings are designed to do away with long lines of hose. By having suspended along the air line a number of hose equipped with this device, connections can instantly be made or disconnected, allowing one hoist to serve in different places. Each size made in duplicate. Containing a shut-off valve.

Send for circulars and details to Pedrick & Ayer Co., Pneumatic Department.

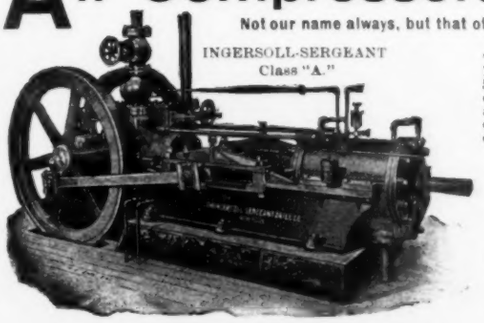
Air Compressors Catalogue No. 32.

Not our name always, but that of others to show what can be done.



INGERSOLL-SERGEANT Class "A."

The Passaic Rolling Mill, Paterson, N. J., with a monthly output of 5,000 tons of structural steel, use 40 cylinder hoists, 12 riveters, 5 drills and reamers, 2 chipping tools and other apparatus, all operated by compressed air from an Ingersoll-Sergeant Class "A" Straight Line Piston Inlet Air Compressor. The plan of distribution of air power necessitated careful engineering and close investigation of the merits of Air Compressors to secure good results. It is the high-class machine, built rigidly, embodying every detail of scientific construction, that wins in a test like this.

Catalogue No. 41, ROCK DRILLS Mines, Quarries, Tunnels Contract Work, Good Roads.

PUMPING MACHINERY FOR EVERY SERVICE

SINGLE AND DUPLEX CRANK AND FLY WHEEL Types.

Don't be misled into thinking that you will save money if you buy a second-rate steam or electric pump. Such an investment is poor economy. You will find after you have used a cheap pump a little while that your money has been literally thrown away. The various amounts you will be forced to spend for repairs from time to time will lighten your purse. Purchase a Worthington machine. There is no better on the market. If you have not a copy of our catalogue, we will be glad to forward one on receipt of request.

STANDARD BOOKS
— ON —
Foundry Practice.

The Iron Founder.

A comprehensive treatise on the art of molding, including chapters on core making, loam, dry sand and green sand molding, also crystallization, shrinkage and contraction of cast iron and a full explanation of the science of pressures in molds, added to which are formulas for mixtures of iron, tables, rules and miscellaneous information. By SIMPSON BOLLAND. Illustrated with over 300 engravings. 12mo; cloth, **$2.50**

The Iron Founder Supplement.

A complete illustrated exposition of the art of casting in iron, comprising the erection and management of cupolas, reverberatory furnaces, blowers, dams, ladles, etc., mixing cast iron, founding of chilled car wheels, malleable iron castings, foundry equipments and appliances, gear molding machines, molding machines, burning, chilling, softening, annealing, pouring and feeding, foundry materials, advanced molding, measurement of castings, wrought iron, steel, etc. Also the founding of statues, the art of taking casts, pattern modeling, useful formulas and tables. By SIMPSON BOLLAND. Illustrated with over 200 engravings; 400 pages; 12mo; cloth, **$2.50**

American Foundry Practice.

Treating of loam, dry sand and green sand molding, and containing a practical treatise upon the management of cupolas and the melting of iron. By THOMAS D. WEST, practical iron molder and foundry foreman. Fully illustrated. Revised. 408 pages; cloth..... **$2.50**

Moulders' Text Book,

Being Part II of American Foundry Practice, giving the best methods and rules for obtaining good castings, with detailed description for making molds. A thoroughly practical book that should be in the hands of every molder. By Thomas D. West. 460 pages; cloth..... **$2.50**

The Practical Brass and Iron Founder's Guide.

A treatise on brass founding, molding, the metals and their alloys, etc. By JAMES LARKIN, late conductor of the brass foundry department in the Penn Works, Philadelphia. A new revised and greatly enlarged edition. Contents: Among the most important and entirely new sections of this edition of this valuable and popular book are the following: Behavior of Metals and Alloys in Melting and Congealing; Malleable Iron Castings; Wrought Iron or Mitis Castings; Manufacture of Steel Castings; Casting of Brass; Casting of Bronze; Bell Founding; Chill Casting; Casting without Core; Casting on to Other Metals; Casting Iron and Other Metals Upon Lace, Embroideries, Fern Leaves and Other Combustible Materials; Some Modern Bronzes. In one volume; 12mo; 400 pages.... **$2.50**

The Encyclopedia of Founding and Dictionary of Foundry Terms

used in the practice of molding. Together with a description of the tools, mechanical appliances, materials, and methods employed to produce castings in all the useful metals and their alloys, including brass, bronze, steel, bell, iron and type founding, with many original mixtures of recognized value in the mechanic arts. Also aluminum, plating, gilding, silvering, dipping, lacquering, staining, bronzing, tinning, galvanizing, britannia ware, German silver, nickel, soldering, brazing, ores, smelting, refining, assaying, etc. By SIMPSON BOLLAND. Author of "The Iron Founder," "The Iron Founder Supplement." 12mo; cloth..... **$3.00**

+MACHINERY + FOR HANDLING **COAL** AND **ORE** WORKS

THE BROWN HOISTING AND CONVEYING MACHINE CO. CLEVELAND, O.
NEW YORK 26 CORTLANDT ST + LONDON 39 VICTORIA ST. S.W.

HE WENT. HE SAW. HE TUMBLED.

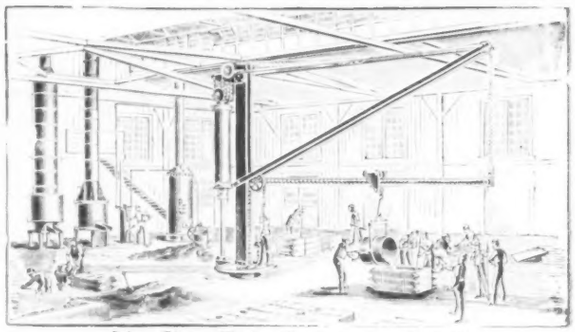
Here's part of a letter just here this week from his majesty, the President himself, of the largest —— works in the world, located in the West. Hear ye him "wunst," as they say up in Lancaster Co.

RIDGWAY & SON, Feb. 20, 1899.

Dear Sirs:—The writer has just returned from his Eastern trip, and begs to report having seen some of your Ridgway Balanced Steam Hydraulic Cranes in operation at the Foundry of Davis & Farnum Mfg. Co., Waltham, Mass., and was greatly impressed with their operation.

We had not contemplated installing new Cranes, but since seeing your Cranes believe we can make changes to advantage in our foundry. We have a place for four Cranes. Are any of your concern contemplating a trip West any time soon? If so, please call here.

BLANK MFG. CO.,
X. Y. Dash, Pres.



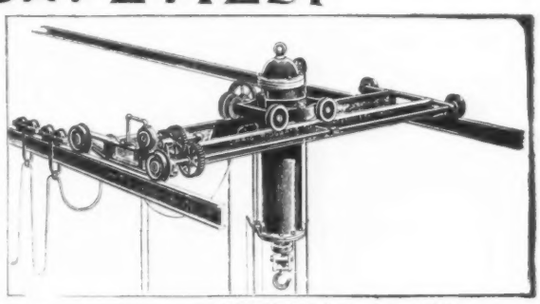
5 ton Steam-Hydraulic Crane in a Foundry.

And that's the way it would be with you also if you would take the trouble to look into the wonderful Ridgway Crane and find out a few things. The only reason you are not using Ridgway Cranes all about your works is because you don't know the machine. No Foundry, Rolling Mill, Wire Works or other plant handling heavy goods can for a day afford to be without Ridgway Cranes.

AIR HOISTS. SAFETIES.

Just seems like wasting money now to advertise these wonderful Oil Governed Hoists, for the problem with us is one of making, not selling them, since people have found out about the machine.

Yet we want you to know about them, and if you can give us a little time to get out your order, we can accommodate you. If you can wait you are a very foolish man to buy any other sort of a Hoist. Cost more than other Hoists, but worth the difference a dozen times.



"Please Take the Elevator."

No Pump, Pullies, City Pressure. Just a Pipe.

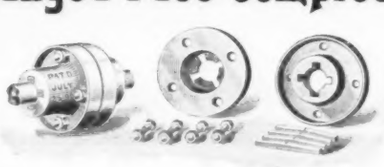
Nicholson Patent Flanged Face Compression Shaft Coupling.

Is easily and quickly attached to or detached from shafting.
Will adjust to a somewhat larger or smaller than standard size shaft.
Has double the grip of other compression couplings and is the most perfect fitting coupling made.



Saves cost of key-seating shafts, fitting keys, and refacing couplings after being keyed on shaft.
Holds the shafts in accurate alignment with each other, the jaws being full length of coupling and extending over both shafts.
Has a very powerful grip equally exerted from FOUR sides (not on two sides as with the majority of couplings).

Price List and Discount on Application.

Our New **SUPPLY CATALOGUE** *(Desk or Pocket Size) will be mailed free to any one on application. Write to any one of the addresses given below.*

12-inch.

Grinding and Polishing Machinery.

These machines are carefully inspected throughout, and are set up and tested at higher speeds than are common in shop practice.

The spindles are ground, the bearings ample and self oiling.

The boxes are interchangeable, the flanges large. Designs throughout are new and up-to-date, and workmanship is careful and accurate.

Catalogue mailed upon application.

For sale by the trade generally, and by Charles Churchill & Co., Ltd., London; Fenwick Freres & Co., Paris, and Schuchardt & Schutte, Berlin.

CARBORUNDUM. . . .

We have an illustrated catalogue which tells a great many interesting things about abrasives.

We have saved money for some people, perhaps we can for you. It will cost you one cent to obtain our catalogue, and it will cost you nothing to try our products.

THE CARBORUNDUM COMPANY,
NIAGARA FALLS, N. Y.

American Emery Wheels

are more carefully made and graded better than other emery wheels They will do finer work and more of it; and they are far safer to use. These are a few of their good points. There are others. Our catalogue tells about them. Send for it.

A Chuck that Holds.

The trouble with ordinary chucks is that the jaws have to centre the tool and drive it too. It's too much; like an overloaded horse, they slip, and wear out, and break down.

In the Pratt Chuck the jaws have only to hold the tool perfectly true; the positive driver does the driving. It can't slip, even if the jaws are not tightened.

It pays to have tools that will always keep at work.

MARKS OF PROGRESS

We shipped Wire Straighteners to Bombay, India, last week. You see they are awaking to improvements over there. Still, right among us you will find manufacturers who, at some public gathering, will tell about the great American Republic and how we beat all nations, and in their factories their operatives are still cutting wire with the cutting plyers of primitive man. How is it with you? Better send for Catalogue of the most modern tools. We will gladly send it.

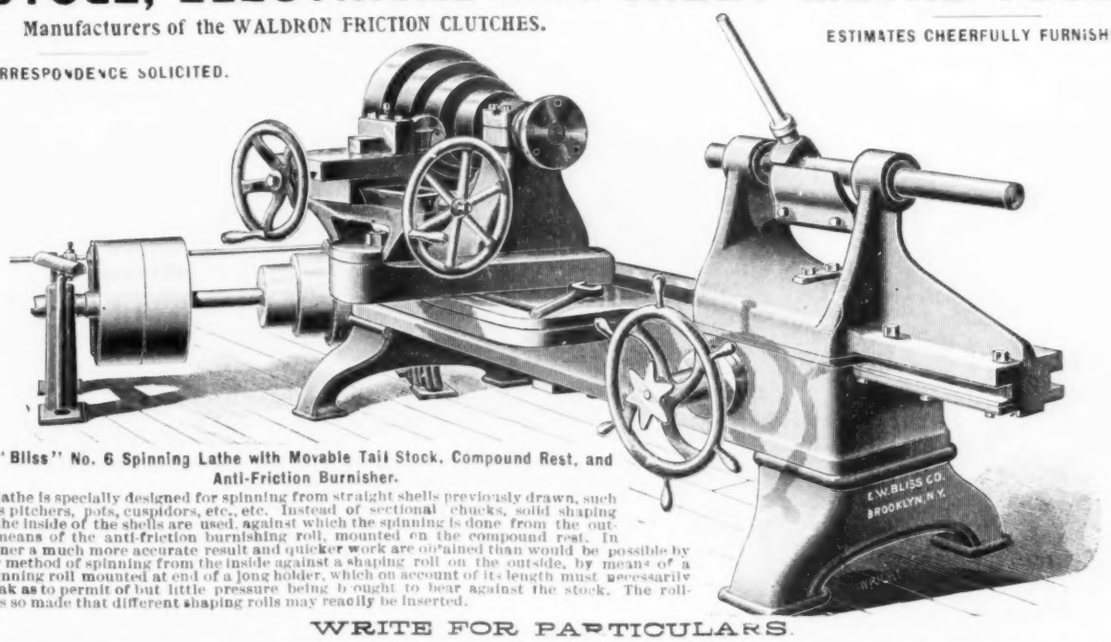
CORRESPONDENCE SOLICITED.



"Bliss" No. 6 Spinning Lathe with Movable Tail Stock, Compound Rest, and Anti-Friction Burnisher.

This lathe is specially designed for spinning from straight shells previously drawn, such shapes as pitchers, pots, cuspidors, etc., etc. Instead of sectional chucks, solid shaping rolls on the inside of the shells are used, against which the spinning is done from the outside by means of the anti-friction burnishing roll, mounted on the compound rest. In this manner a much more accurate result and quicker work are obtained than would be possible by the older method of spinning from the inside against a shaping roll on the outside, by means of a small spinning roll mounted at end of a long holder, which on account of its length must necessarily be so weak as to permit of but little pressure being brought to bear against the stock. The roll-carrier is so made that different shaping rolls may readily be inserted.

FOR SALE
Bessemer Plant and Blooming Mill

of the North Branch Steel Company.

Plate Mill For Lease

SITUATED AT : : : : DANVILLE, PA.

The Steel Plant is entirely new and practically ready for operation; it contains two 5-ton vessels and a 32-in. reversing Blooming, Slabbing and Billet Mill. If desired, its 28-in. Plate Mill, which is situated only a short distance from the Slabbing Mill, could be leased.

Danville is on the line of the Catawissa Branch of the P. & R. R. R. and the Bloomsburg Branch of the D., L. & W. R. R.; is directly across the river from and connected by bridge with South Danville through which a branch of the P. R. R. runs, and is within 12 miles by rail of Northumberland, through which the Northern Central Branch of the P. R. R. passes.

There is a good home market for a part of the product of the above plant, and the starting of it up would make Danville an excellent location for a Tin Plate Works. Full information may be obtained of

THE NORTH BRANCH STEEL COMPANY,
25th St. and Washington Ave., · PHILA., PA.

Locations for Industries.

The Chicago Milwaukee and St. Paul Railway Company has all its territory districted in relation to resources, adaptability and advantages for manufacturing, and seeks to secure manufacturing plants and industries where the command of raw material, markets and surroundings will ensure their permanent success.

A number of new factories and industries have been induced to locate—largely through the instrumentality of this company—at points along its lines.

The trend of manufacturing is Westward. Confidential inquiries are treated as such. The information furnished a particular industry is reliable.

Executor's Sale to Close an Estate

OF

Valuable Coal, Timber & Farming Lands

In Somerset County, Pa.

6,000 ACRES MORE OR LESS.

ADRIAN H. MULLER & SON

will sell at auction on

TUESDAY, APRIL 4th, 1899,

At 12 o'clock noon, at the N. Y. Real-Estate Salesroom, No. 111 Broadway, New York City.

This property is about 2¾ miles west of WEST SALISBURY STATION on the SALISBURY BRANCH, BALTIMORE AND OHIO R. R., which is a good shipping point; the Railroad having surveyed for an extension of their road to within ¼ mile of these lands, makes it easy of access. The Mutual Telegraph Co. run over the lands around the public roads.

THESE LANDS are underlaid with BITUMINOUS COAL, FIRECLAY, IRON ORE and LIMESTONE, and have a fair average of the several kinds of Timber grown in this section, viz.: WHITE OAK, RED OAK, HEMLOCK, ROCK OAK, ASH, POPLAR, CHERRY, BLACK BIRCH, CHESTNUT, etc.

After the timber is cleared off, will make good farming and grazing lands, being well supplied with running streams.

THE ATTENTION OF COAL COS., IRON AND COAL MINERS, AND RAILROAD COS., ALSO CAPITALISTS, IS CALLED TO THE SALE OF THIS PROPERTY.

50 PER CENT. may remain on **BOND AND MORTGAGE** at 5 per cent. interest for One Year or all cash if desired. **Reports** of **E. V. D'Anvilliers, Geologist** and **Mining Engineer,** of **Philadelphia,** and other particulars can be had at the **Auctioneers'** office, **24 Pine Street, N. Y. City.**

FOR SALE
Bessemer Plant and Blooming Mill

of the North Branch Steel Company.

Plate Mill For Lease

SITUATED AT : : : : DANVILLE, PA.

The Steel Plant is entirely new and practically ready for operation; it contains two 5-ton vessels and a 32-in. reversing Blooming, Slabbing and Billet Mill. If desired, its 28-in. Plate Mill, which is situated only a short distance from the Slabbing Mill, could be leased.

Danville is on the line of the Catawissa Branch of the P. & R. R. R. and the Bloomsburg Branch of the D., L. & W. R. R.; is directly across the river from and connected by bridge with South Danville through which a branch of the P. R. R. runs, and is within 12 miles by rail of Northumberland, through which the Northern Central Branch of the P. R. R. passes.

There is a good home market for a part of the product of the above plant, and the starting of it up would make Danville an excellent location for a Tin Plate Works. Full information may be obtained of

THE NORTH BRANCH STEEL COMPANY,
25th St. and Washington Ave., - PHILA., PA.

Address

HERO STAMPING WORKS,
Room 407, Cuyahoga Bldg., Cleveland, O.

Locations for Industries.

The Chicago Milwaukee and St. Paul Railway Company has all its territory districted in relation to resources, adaptability and advantages for manufacturing, and seeks to secure manufacturing plants and industries where the command of raw material, markets and surroundings will ensure their permanent success.

A number of new factories and industries have been induced to locate—largely through the instrumentality of this company—at points along its lines.

The trend of manufacturing is Westward. Confidential inquiries are treated as such. The information furnished a particular industry is reliable.

Address

LUIS JACKSON,
Industrial Commissioner, C., M. & St. P. R'y,
Old Colony Building, Chicago, Ill.

RE-LAYING STEEL RAILS.

3,000 tons Prime Re-Laying Steel Rails, 56 lbs. per yard, with all the Angle Fish Plates to suit, for delivery in New York Harbor.

DANA & CO., 32 Broadway, New York.

Cable Address: "Dana, New York"

A Foundryman's

life is not a happy one at the best, and if to his general misery is added bad coke, it is not worth living. Defective castings are often traced back to poor fuel, bought generally upon somebody's recommendation, who ought to know better.

We are coke manufacturers and can guarantee our own production.

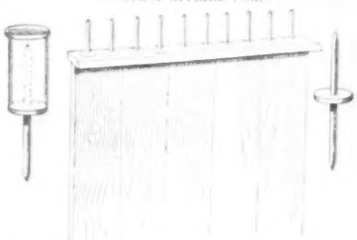
VINTON COLLIERY CO.,

Real Estate Trust Building,

PHILADELPHIA.

Rivet Nail and Driver.

(PATENT APPLIED FOR.)



Would like to hear from some hustling firm willing to place this nail on the market. A grand nail for fences and a substitute for barbed wire, and also for nails driven through boards and nailed on fences.

I. W. LUKACH, 112 E. 93d St., New York.

Method No. 1:

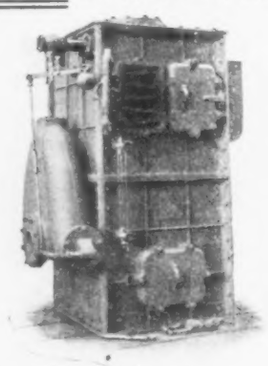
Method No. 2:

Pumping Through, Instead of From, A Feed-Water Heater.

Method No. 1: The Pump draws or receives the water intended for the boilers in its original condition; that is—cold, and with all its impurities. The pump then forces (against the pressure in the boiler, and against the friction) this water into the Heater: the pump does not stop pushing the water so long as it is in operation, and it also pushes along all the mud, organic matter, etc. The Heater ***is part of the pipe line*** to the boilers—the water must keep moving through it—and so must the mud. The carbonates of lime and magnesia become insoluble—that is, they are precipitated when the carbonic acid gas is ***driven off*** by the heat of exhaust steam, but there is little or no chance within a closed or pressure heater for these gases to free themselves, and so the carbonates in solution pass on through the heater into the boilers, where the gases can get away from the water the same as the steam does, and then precipitation and deposit occur.

Absolutely no purification obtainable with this type of heater except when the water comes to rest, which occurs only when the plant is shut down.

Method No. 2: The gases liberated by the heat of the exhaust are free to find their way to the atmosphere, for the ***"Cochrane" Heater*** is an "Open Heater," therefore the carbonates have a chance to form in flaky or solid particles, and it is only a question of providing a suitable lodging place for them, as well as for the mud—tray surface, settling chamber, and a filter bed in the ***Cochrane Heaters.***



The exhaust steam condensed in heating the water amounts to say 1-6th or 1-7th of the total supply. This is saved and used, being mixed with the other water. No scale forming matter whatever in this condensed steam.

The Heater in method No. 2 has to carry less than one pound of pressure—the Heater in case No. 1 must be built to carry boiler pressure, and, therefore, it is heir to all the ills of boilers—expansion and contraction strains, leaky joints, etc.

Is there any question as to which is the preferable system to adopt?

We have hundreds of thousands of horse power of ***Cochrane Heaters*** proving that method No. 1 cannot "hold a candle" to method No. 2, though this we would like to have you prove for yourself by installing one of our ***Cochrane Open Heaters.*** We send them on trial.

myself infinitely prefer performance to promise, and in such preference will scarcely be regarded as eccentric.

I can learn more of any one's advertising possibilities from a few "inches" of his actual work than from "ells" of his promises, be they never so specious and seductive. I desire to be measured by precisely such standard, and will be pleased to mail, to interested correspondents (without charge), a liberal collection of miscellaneous samples of my work.

By "Interested Correspondents" I mean persons who desire to further investigate seeming opportunities to better their present advertising ventures, and not merely idle clerks or office boys with nothing but curiosities to be satisfied—distinctly not such.

I make Circulars, Folders, Price-Lists, Catalogues, Trade Primers, Circular Letters, Announcements, Mailing Cards, Booklets, Notices, Newspaper, Periodical and Trade Journal Advertisements, etc., etc.

I gain *new clients*, chiefly from those who have first seen what I have been doing for old ones.

NOTICE.

BEING advised by many retailers and consumers that when they place orders with jobbers for Star Hack Saw Blades other brands are frequently substituted, we desire to notify all parties that we will, upon request, either furnish names of jobbers throughout the country who will supply the Star blade, or else we will send what is wanted ourselves. Each dozen blades are labeled with the brand, etc. Don't be misled when blades are supplied without labels, but look for the ★ which is stamped in every blade we make near the pin hole. Our Star blades have become very staple, and some dealers attempt to increase their profits by substituting inferior goods which they buy at lower prices.

IMPORTANT DECISION RELATING TO THE

HEINISCH

TRADE-NAME ON SHEARS, TRIMMERS, &C.

The U. S. Circuit Court, Southern District of New York, Judge Townsend, has rendered a decision in the suit of "R. Heinisch's Sons Co. vs. Hermann Boker & Co."

"The Complainant is entitled to an accounting, and to an injunction restraining them from using the names 'Heinisch' or 'H. C. Heinisch' on its Shears, Labels, etc., and otherwise, in any way which will interfere with Complainant's enjoyment of the benefits of its Trade-name."

Referring to the above decision we would respectfully state our determination to protect our rights in the premises and warn all persons against any imitation of our Trade-name.

PEARCE'S IMPROVED CAHOON PATENT BROADCAST SEED SOWER

Is as much superior to any other device for sowing grain as the modern electric light is better than a tallow candle. The CAHOON is not the lowest price seed sower, but taking into consideration the durability of the machine, the ease with which it is operated, and the quality of its work, it is the cheapest. Pays for itself every day that it is used. Sows all kinds of grain and cleaned grass seed; does five times as much work as can be done by hand with two-thirds the amount of seed, and does it better than it can be done in any other way.

Dealers who handle the CAHOON make a profit and a satisfied customer at the same time. They stay sold. A prominent hardware dealer in the South wrote us under date of Feb. 13, '99, "We are not handling any other broadcast seeder similar to yours. Tried this some years ago and got enough of it."

Retail dealers supplied at factory prices promptly by our wholesale agents at all principal distributing points.

GOODELL COMPANY,

ANTRIM, N. H.

The '98 Chicago Clipper Retails For $8.75.

HARDWAREMEN—DO NOT ORDER

another old-fashioned, out of-date two-hand horse clipper. Be enterprising and order the '98 CHICAGO CLIPPER. The greatest clipping machine ever invented; holds the world's record for fast clipping; time 14 minutes. You can sell one of these machines to every man who used to buy the old fashioned two-hand variety. Ask your jobber about them or send to us direct.

HAIR CLIPPERS.

If you want a clipper "with a reputation" insist on the "Stewart Patent." There is no other "just as good" and they will cost you no more than the inferior kind.

We have just been awarded Gold Medal at Trans-Mississippi Exposition, highest and only award for horse clipping, sheep shearing and cattle grooming machines.

Dry Battery Portable Electric Safety Lamp...

This is an Electric Lamp set in a White Enamel Parabolic Reflector, and can be attached to the cap or any part of the clothing by means of a stick-pin attached to reflector and connected to the battery with a flexible cord. The battery is arranged to be carried on a belt or in the pocket. So the user has free use of hands. The current can be turned off when not in use. Dry batteries are used and can be recharged from direct Incandescent Electric Current Charger and full directions go with each Lamp.

IS USED BY THE FOLLOWING: For Watchmen, Miners, Mine and Gas Inspectors, Boiler Shops, Oil and Gas Works and Gas Fitters, City Sewer and Underground Cable Inspectors; Powder Mills and Warehouses where explosive materials are manufactured and stored; exploring cellars and trenches where leaks occur, and investigating pipe connections where it is impossible to carry an oil lamp or candle for fear of explosion—and all parties requiring a safe portable light. The whole outfit is neat and compact.

No. 1 weighs 2 lbs., 1½ C. P. Price complete, $4.00. For Meter Reading Only.

No. 2 weighs 3 lbs., 4 C. P. Price complete, $6.00. For General Use.

THIS volume has been compiled from the extended series of articles in *The Iron Age*, on the arrangement of Hardware Stores, and contains a large and varied mass of information in regard to store arrangement.

A chapter is devoted to each subject and all are fully illustrated.

The summary of contents will convey an idea of the wide scope of the work, which treats of almost every subject connected with the arrangement of Hardware Stores.

Every hardware merchant should have a copy.

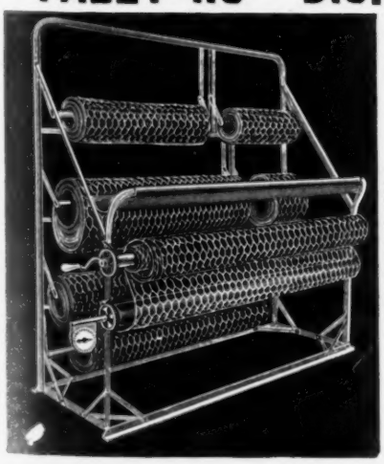
"TALLY-HO" DISPLAY RACK AND MEASURING MACHINE



PATENT ALLOWED.

Arranged for conveniently measuring, winding and handling **POULTRY NETTING**

The MEASURING AND HANDLING OF POULTRY NETTING has been a most trying and vexatious problem. The "TALLY-HO" has solved the long vexing question of how to measure the stubborn stuff. It is needless to enter into the details of all the disagreeable annoyances attending the retailing of an article that is growing in demand each year. You know what they are, and a description of the machine will show you that they are all overcome and that the selling of any number of feet, of any width, can be done in a few minutes by one person with pleasure instead of trial and trouble.

The machine is made of GALVANIZED IRON, occupies only 28 INCHES by 80 INCHES floor space and is 70 INCHES HIGH, and holds one bale each 12, 24, 36, 48, 60 and 72 inch netting.

ITS CONSTRUCTION is on STRICT MECHANICAL PRINCIPLES, and with ordinary usage it WILL LAST A LIFE TIME.

It winds the netting compactly while measuring, and the rolls are easily tied and ready for delivery.

It provides a place where netting is always in view, and makes a display of what under the old way is a ragged looking lot of cut pieces always in the way.

It saves much waste in taking care of small pieces. It saves time and the annoyance of carrying the bales out to the street to cut and measure.

IT IS GUARANTEED to do the work claimed for it, and embodies every need for rapid and easy handling of poultry netting.

These are facts that will merit and command your attention.

YUKON Refrigerators.

ARTHUR BRITTAN & CO.,

136 Lake Street, - - Chicago,

General Sales Agents.

The Yukon combines all the best points of the best makes with several new features, which makes it the best Refrigerator on the market.

The Yukon is made in two styles, with ***Removable Flues,*** and with the ***entire Ice Chamber Removable.***

We note some of the excellent features of the Yukon:

Thoroughly seasoned ash lumber.
Elegance of finish.
Carved panels.
Swinging and removable base board.
Solid bronze hardware, Roman gold finished.
Zinc lined. Patent casters.
Galvanized iron flues, ice rack and shelves.

The shelves being so constructed that small dishes placed upon them will not tip over.

Patent Trap, connected with waste pipe in bottom of provision chamber, where it is most accessible, both trap and waste pipe being easily removed cleaned and replaced, without a back-breaking process or poking with a stick.

The insulation used is ***Granite Rock Wool*** and Charcoal Sheathing.

Buy the Yukon and you will have the best Refrigerator made as well as an elegant piece of furniture.

MANUFACTURED BY

THE MICHIGAN BARREL CO.

GRAND RAPIDS, MICH.

The America..

is the best refrigerator made, and has the following superior points:

Perfect circulation. Patented removable galvanized steel ice compartment. Most economical in ice consumption. Absence of odors. Freedom from moisture on walls. Direct drainage to drip pipe. Divided shelf. Swinging fall board.

Order a sample to compare with the one you are now handling, and be your own judge, or send for catalogue. Our prices are right.

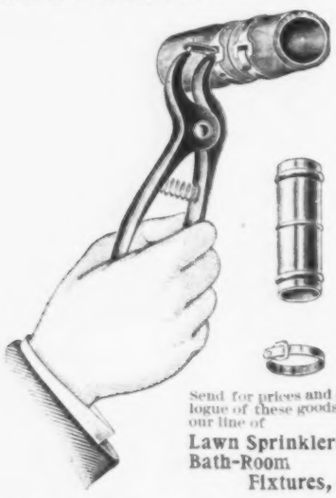
NEW CRESCENT
HOSE MENDER.

IT'S FLAT—Won't cut the hose; mender and bands are of brass; pliers of iron, handsomely Japanned. Simple, convenient. Screw menders tear the lining and wire bands cut. Our flat bands make secure couplings and positively will not injure the hose. Are rapid sellers.



Send for prices and catalogue of these goods and our line of
Lawn Sprinklers,
Bath-Room
Fixtures, etc.

CRESCENT BRASS & IRON COMPANY,
DETROIT, - MICH.

THE TOLER
Liquid Door Check and Spring.
PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective**, giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

Patent "Clincher" Fifty Carbon "Swedoh" Spring Steel Cycle Tubing.

GLIDDEN'S METALLIC REPAIR OUTFIT

The one that has the Hinged Plugs.

THIS is the smallest, neatest, most compact and practical repair outfit ever offered to the public. Complete in a tin box 1½ inches long, 1 inch wide and ¼ inch thick. It will repair a puncture at once, without the use of cement, and any woman or child can use it. The plug is made of metal with a **hinged head, which can be forced into a much smaller opening than one with a stationary head.** Two sizes of plugs are furnished with each kit, which will fit ordinary punctures; also a cutter is furnished, to be used when the puncture is too small to admit the plug.

Directions for use. Place the flat plate of the plug so it will be loose on the key. Screw the key into the plug and insert into the hole, leaving the flat plate on the outside of tire. Draw back the key so that the plug will rest flat on the inside of the tire. Screw the flat plate to plug with wrench (left hand thread), and turn key to right. Remove the key by turning to left, and you have a permanent repair which does not injure the tire or its looks.

DISCOUNT TO THE TRADE. ASK YOUR JOBBER FOR IT.

PAYNE'S BUSINESS AND SOCIAL LETTER WRITER

Containing Commercial Forms and Specimen Letters on Business and Social Topics with Appropriate Answers.

This is not the only *Letter-Writer* published, but it is the only one we know of that contains model letters for all the occasions of Social life and of Business life. The specimens given are really models in every respect—in address, in phraseology, and signature, as well as in the use of capitals and punctuation marks. There are letters of favor; letters of introduction, congratulation, and advice; invitations acceptances, regrets, and excuses; letters to accompany presents—in short, letters of all sorts to all sorts of people. Follow these models and you cannot go wrong. More than this, the book gives rules for spelling and punctuation, the postal laws, a dictionary of abbreviations, and the Latin, French, Spanish, and Italian words and phrases that may be used effectively by writers in English.

Containing 350 Pages, 12mo, Cloth. Price, $1.00, postpaid.

Infringers are being prosecuted.

The Valance Hammock has merits in addition to those of grace and beauty. The Valance serves to screen the body, or may be used as a covering.

The Royal is strung to give divided suspension, with wood bars, continuous stringing, and adjustable hitch ends for single ouble ropes.

PALMER'S ARAWANA (Patented).

As used with Trapeze uspension.

CUT NO 162.

The above figure shows an Arawana slung from a Trapeze adjusted to its maximum extension as regards its suspension from the ceiling.

The Trapeze Suspension, as may be seen at a glance, is especially adapted to Veranda use, is adjustable to different sizes of Hammocks within its scope (from 6 ft. 8 in. to 11 ft.), and to giving different degrees of dip and heights of suspension. Every conceivable swinging motion is obtained without effort.

THE ART OF SELLING.

By F. B. GODDARD. 12mo, Flexible Cloth, 50 Cents.

In this book the author lets the reader into the secrets of the accomplished and successful salesman, illustrates his tact and finesse, and tells how he masters men: but beyond this, the work embraces much information which will be instructive and useful to all classes of business men. Besides suggestions to buyers, it contains chapters on "Changes in Business Conditions and Methods." "Salesmen's Compensation." "Retail Merchants and Salesmen," "Saleswomen," "How to Read Character," with a collection of clearly and tersely put important Legal Principles and Decisions Governing Sales Sent, post-paid, upon receipt of price, by

THE WINNER LIFTING JACK...

This size, No. 1, weighs less than 5 lbs. and will lift 800 lbs. No. 2 weighs just 5 lbs. and will lift 1,500 lbs. The lifter may be raised or lowered to any point on the standard. Wherever it is stopped it becomes instantly locked. It is loosened again instantly by raising the lever to an upright position. The load may be raised gradually to the desired height by working the lever up and down. Made in two sizes, Nos. 1 and 2.

It is the finest finished Knife. All leading Jobbers sell it.

NEY MFG. CO., Canton, O.

"Small Talk About Business."

By A. E. RICE.

A Banker's Business Hints for Men and Women.

A bright man, with his wits about him, is often described as "All Business." Being "all business" is knowing how to do the right thing the right way.

Do you want to be "all business?" The book tells. The wrong way wastes money and wastes time. Where is the good of that? The book tells nearly everything that an enterprising business man ought to know. Everything in it is worth knowing.

The book is called "Small Talk About Business." It is full of money-saving talk for old and young, for men and women, for business-like and unbusiness-like people. YOU ought to have it.

Price, 50 cents. 120 Pages. Elegant Cloth Binding.

DAVID WILLIAMS CO., Publishers and Booksellers, - 232-238 William Street, New York

FITCHBURG, MASS.

LADD'S DISCOUNT BOOK.

For Example, we desire to find the net of $73.00 at discount 65, 20, 7½, 5 and 2½ per cent. By the old way we take our pencil, and, after a deal of figuring, conclude (if we haven't made an error) that the result should be $17.51, but we are not sure of it till we prove it. By the new way (the use of Ladd's Discount Book), we put our finger right on it in a moment, and know that the result is correct.

The book contains over 100,000 computations, and is indispensable where percentages are employed. Price, per mail, $3.00. Double Indexed Edition, $4.00.

For Sale by DAVID WILLIAMS CO., Publishers and Booksellers, 232 William St., New York.

NORTH AMERICAN METALINE CO., 43 Third St. Long Island City, N. Y.

Gentlemen: Your favor of 20th inst. received; in reply are pleased to say that your Metalined Bushings have given us entire satisfaction. We first applied them in 1886 or '87 under very trying conditions, put them in fast running loose pulleys with high tension belt, and they gave perfect satisfaction. Since then, we have extended their use throughout our works, and they have given satisfaction wherever we have placed them. Very truly yours,

JAS. PYLE & SONS.

New "Cold" Process of Galvanizing.

In use for more than two years with best and absolutely satisfactory results. Articles that cannot be galvanized by any other process, such as screws, nuts, cutting instruments, tools of every description, springs, locks, artistic metal articles, can be galvanized in a superior manner by this process. The multitude of articles that can be galvanized is without limit. Uniformly smooth surface is preserved, thickness of coating can be regulated, saving of spelter about 80%, besides many other advantages. *We grant licenses for territory, also shop rights on royalty basis.*

Fulton Engineering & Ship Building Works

San Francisco Sept. 29/98.

Hoyt Metal Co.,
St. Louis, Mo.

Gentlemen:-

Reporting on the merits of the Nickelehe Babbitt Metal, we have used a large quantity of it with the most satisfactory results. It has given better satisfaction than any other babbitt metal we have used, including all the standard brands, particularly for electric and marine engine bearings where it is subject to the severest duty.

We will be pleased to give you or others the names of steamers using it, also the names of their engineers and owners to whom any one can write. Without exception we believe, that all will speak favorably of it and from our own experience with it and other metals we decidely recommend it.

Very truly,
FULTON ENGINEERING & SHIP BUILDING WORKS.

Dict. by J. S. Sr. James Speirs Pres

YOU WILL SEND US AN ORDER.

HOYT METAL CO.

Nickelene, although very hard, is so tough that it can be hammered to a knife edge.

Nickelene is being used by many in place of Phosphor Bronze.

Nickelene can be melted in an iron ladle or kettle, and at a little higher temperature than that necessary for melting Babbitt Metal, runs freely and makes a good casting.

NICKELENE
IS THE BEST BABBITT METAL IN THE WORLD.

WRITE US FOR PRICE.

¶ Do you want good Roofing? do you want that which is most economical? Do you want that which is most practical? If so, write for our Cat. and see what we have to offer.

The U. S. Wire Mat...

The cut shows a 50 ft. roll of our Wire Matting, from which the dealer can cut any length mat to suit his customer.....

To clean your feet on a U. S. Wire Mat, all you have to do is—walk on it.
To clean the mat, all you have to do is—pick it up.

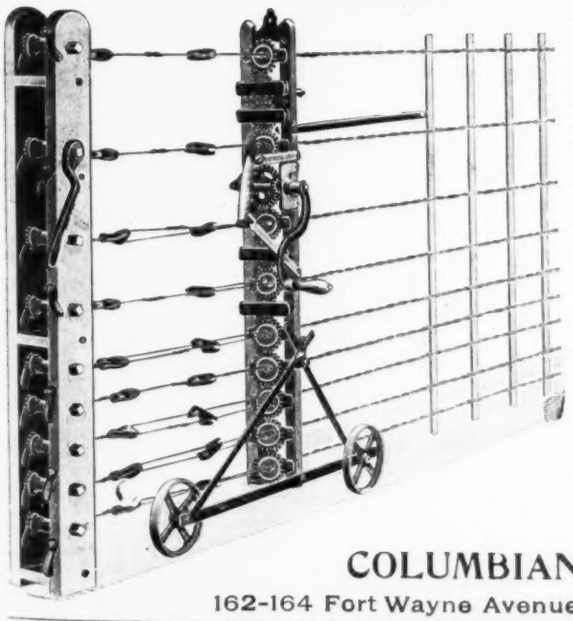
It does not curl up at the corners.
It does not hold the dirt.
It rolls up like a carpet.
It is made in all widths.

Write for our Booklet.

UNITED STATES WIRE MAT CO., - - Decatur, Ills.

FENCE MACHINES.

THE PEERLESS IS THE LEADER.



USES either wood or metal pickets and places them *any* distance apart. This cut shows our No. 9 Peerless, 9 double strand, which builds a 4 ft. fence.

No. 10 Peerless builds a 4½ ft. fence, 10 double strand. The Little Giant of World Renown made only by this Company, Style A is a 5 double strand, Style B 3 double strand, both build a 4 ft. fence.

Easiest running machines made. Anyone can operate them. For prices and other information, address

COLUMBIAN FENCE CO.,
162-164 Fort Wayne Avenue, RICHMOND, IND.

Helwig's Patent Bolt and Rivet Clipper

Light, Strong, Powerful, Durable.

No. 1 cuts ¾ or less.
No. 2 cuts 9-16 or less.
No. 3 cuts ½ or less.
No. 4 cuts ⅜ or less.

CUTS CLOSE TO WORK.

Be Progressive

and use Aluminum Coated Sheet Steel.

Superior in all respects to galvanized iron. It contains all its merits, with none of its defects. It is united more firmly to the base, consequently does not peel like galvanized iron. It can be heated to a red heat without destroying the coating. Sulphurous gases, brine, salt and acids do not affect it as readily as galvanized. It can be soldered with common solder. It is the only metal that will hold kerosene, gasoline and all other carbon oils satisfactorily. Give it a trial and be convinced. Prices and samples furnished on application.

The above illustration shows the interior of a Brass Rolling Mill, the roof of which was designed and built by us for the Seymour Mfg. Company, at Seymour, Conn. The building is 160 ft. in width, divided into two parts 80 ft. each—200 ft. in length. The roof trusses are designed not only to carry roof loads but are also made of sufficient strength to carry heavy shafting as well as to lift the rolls in and out of the housings.

ATLAS METAL.

TENSILE 50,000 POUNDS.

Atlas Metal is defined by Prof. Charles James, the well-known Steel Expert, as "A New Commercial Product, standing between Iron and Steel, and uniting in itself the best characteristics of both."

ITS CHIEF POINTS ARE

GREAT STRENGTH. GREAT WEAR. UNIFORMITY. EASILY MACHINED.

HOMOGENEOUS.—Atlas Metal is not surface treated—the castings can be made of any weight, size or thickness, and the metal will be of uniform structure and entirely homogeneous throughout.

STANDARD BOOKS
— ON —
Foundry Practice.

The Iron Founder.

A comprehensive treatise on the art of molding, including chapters on core making, loam, dry sand and green sand molding, also crystallization, shrinkage and contraction of cast iron and a full explanation of the science of pressures in molds, added to which are formulas for mixtures of iron, tables, rules and miscellaneous information. By SIMPSON BOLLAND. Illustrated with over 300 engravings. 12mo; cloth, **$2.50**

The Iron Founder Supplement.

A complete illustrated exposition of the art of casting in iron, comprising the erection and management of cupolas, reverberatory furnaces, blowers, dams, ladles, etc., mixing cast iron, founding of chilled car wheels, malleable iron castings, foundry equipments and appliances, gear molding machines, molding machines, burning, chilling, softening, annealing, pouring and feeding, foundry materials, advanced molding, measurement of castings, wrought iron, steel, etc. Also the founding of statues, the art of taking casts, pattern modeling, useful formulas and tables. By SIMPSON BOLLAND. Illustrated with over 200 engravings; 400 pages; 12mo; cloth, **$2.50**

American Foundry Practice.

Treating of loam, dry sand and green sand molding, and containing a practical treatise upon the management of cupolas and the melting of iron. By THOMAS D. WEST, practical iron molder and foundry foreman. Fully illustrated. Revised. 402 pages; cloth..... **$2.50**

Moulders' Text Book,

Being Part II of American Foundry Practice, giving the best methods and rules for obtaining good castings, with detailed description for making molds. A thoroughly practical book that should be in the hands of every molder. By Thomas D. West. 460 pages; cloth..... **$2.50**

The Practical Brass and Iron Founder's Guide.

A treatise on brass founding, molding, the metals and their alloys, etc. By JAMES LARKIN, late conductor of the brass foundry department in the Penn Works, Philadelphia. A new revised and greatly enlarged edition. Contents: Among the most important and entirely new sections of this edition of this valuable and popular book are the following: Behavior of Metals and Alloys in Melting and Congealing; Malleable Iron Castings; Wrought Iron or Mitis Castings; Manufacture of Steel Castings; Casting of Brass; Casting of Bronze; Bell Founding; Chill Casting; Casting without Core; Casting on to Other Metals; Casting Iron and Other Metals Upon Lace, Embroideries, Fern Leaves and Other Combustible Materials; Some Modern Bronzes. In one volume; 12mo; 400 pages.... **$2.50**

The Encyclopedia of Founding and Dictionary of Foundry Terms

used in the practice of molding. Together with a description of the tools, mechanical appliances, materials, and methods employed to produce castings in all the useful metals and their alloys, including brass, bronze, steel, bell, iron and type founding, with many original mixtures of recognized value in the mechanic arts. Also aluminum, plating, gilding, silvering, dipping, lacquering, staining, bronzing, tinning, galvanizing, britannia ware, German silver, nickel, soldering, brazing, ores, smelting, refining, assaying, etc. By SIMPSON BOLLAND. Author of "The Iron Founder," "The Iron Founder Supplement." 12mo; cloth..... **$3.00**

Horizontal Hoist.

Pat. Sept. 4th, 1894.

Air Hose Coupling.

For ½ inch, ¾ inch and 1 inch Hose.

These Compressors will compress more air at less cost than any other make, requiring no attention other than oiling; entirely automatic in action, stopping and starting as air is required. Specially adapted for foundry use. Can be run in series; if so, no stoppage possible.

Horizontal Air Lift for low ceilings; for general lifting; quick in action and under perfect control of operator. Straight Air Lift for foundry purposes; when equipped with retaining and releasing valve will hold the load, whether heavy or light, in the desired position, as in case of lifting a ladle of molten iron and pouring it or raising a flask to knock out the sand. It can neither ascend nor descend as long as connected to air supply.

Air Hose Couplings are designed to do away with long lines of hose. By having suspended along the air line a number of hose equipped with this device, connections can instantly be made or disconnected, allowing one hoist to serve in different places. Each size made in duplicate. Containing a shut-off valve.

COCHRANE HEATERS.

THE ADVANTAGE WE HAVE:

There would not be half the market for boiler cleaners and boiler compounds that exists to day if steam users would only take steps to purify their boiler feed supply before they put it into the boilers. Any water, no matter how full of sulphates, carbonates, or other scale forming matter, can be improved by passing it through a **COCHRANE HEATER and PURIFIER.**

There are other heaters which give no purification Our **COCHRANE HEATERS & PURIFIERS** *do give it* – and there's one of the advantages we have.

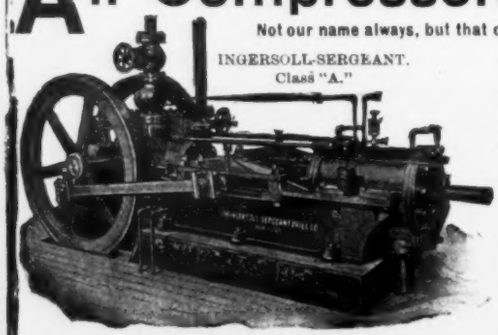
Air Compressors Catalogue No. 32.
Not our name always, but that of others to show what can be done



INGERSOLL-SERGEANT.
Class "A."

The Passaic Rolling Mill, Paterson, N. J., with a monthly output of 5,000 tons of structural steel, use 40 cylinder hoists, 12 riveters, 5 drills and reamers, 2 chipping tools and other apparatus, all operated by compressed air from an Ingersoll-Sergeant Class "A" Straight Line Piston Inlet Air Compressor. The plan of distribution of air power necessitated careful engineering and close investigation of the merits of Air Compressors to secure good results. It is the high-class machine, built rigidly, embodying every detail of scientific construction, that wins in a test like this.

LIQUID BRAZING.

The economies and advantages of liquid brazing are not confined to bicycle manufacturers, although they are the ones that have developed it and demonstrated its great advantage and economy over the old-time fire brazing.

One bicycle manufacturer estimates that he is saving twenty dollars per day every day he runs the new system, besides requiring fewer workmen and less fuel.

A descriptive pamphlet will be sent to all who are interested.

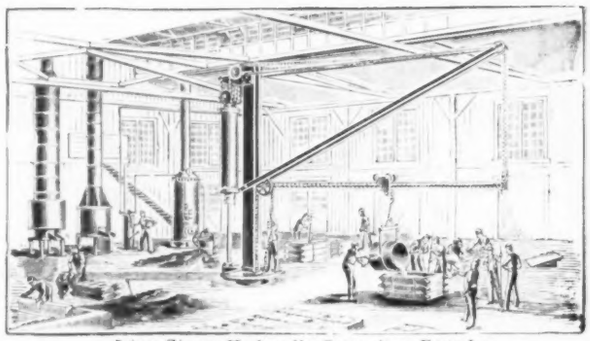
NEW YORK 26 CORTLANDT ST + LONDON 39 VICTORIA ST. S.W.

LIKE SNAKES IN SPRING

the old mills and furnaces, which have been asleep so long are beginning to wake up under the warm sunshine of good times and better prices.

We want these mills and furnaces to remember, in fixing themselves up, that the Ridgway Steam Hydraulic Crane is just the machine to get for handling the materials cheaply. We give the most perfect of Hydraulic installations without any need for pumps or accumulator. At a comparatively small cost these cranes can be bought and hooked right to the ordinary steam supply of the works and you have a perfect hydraulic outfit.



5 ton Steam-Hydraulic Crane in a Foundry

REMEMBER this and you will save many a dollar. If you conclude to use Ridgway Cranes be sure to send your order in as far ahead of requirements as you can. We are not wearing out leather these days hunting orders.

HYDRAULIC AIR HOISTS.

If you want the best air hoists made you will get our Oil Controlled Air Hoists. Cost more than other Hoists to buy because they cost more to make, but they are worth the difference a dozen times over. If you don't believe it ask the dozens of best shops all over the land who are getting them as fast as we can make. Just like an angel for gentleness and the Air Gun quality entirely overcome.

The Yankee Drill Grinder

Will pay for itself more times in a single year than any other appliance you can put into your plant.

WHY?

Because no tool is used so often as the twist drill.

To have a drill ground mechanically correct means, 1st, that it will cut just twice as fast as if one lip only is cutting; 2d, that it bores a uniformly true hole (a thing impossible with hand ground drills); 3d, a drill ground on our machine will bore over *twice* the number of holes without regrinding that a hand ground drill will; 4th, the life of the drills themselves will be three times as long as if ground by hand. Stop and think what all this means to you.

It grinds both flat and twist drills, has the greatest range of any grinder made—from $\frac{1}{8}$ to $2\frac{1}{4}$ inch drills—and is the *only* grinder giving any clearance desired. We guarantee it to be the best machine for the purpose in the world.

In use in hundreds of the largest concerns in the country. List of users and testimonials gladly given.

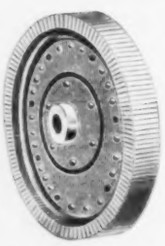
Compress Wheel Talks.



No. 1.

WE offer the Compress Wheel to such manufacturers as are, of necessity, very hard upon their polishing wheels. We mean those whose work is such that it uses up wheels very fast. The construction of our wheel guarantees its absolute safety when run at any speed, and by reason of its unique abrasive and wearing powers, it must always look back to find its competitors. Naturally we issue a catalogue, which we would like you to see. Shall we mail it?

Drill chucks that can't keep their temper have lost many a machinist's temper too.

The jaws soon wear, and the drill slips—always at a critical time

Pratt Positive Drive Drill Chucks keep both their own temper and the machinist's. Tools held by them never slip The flat end of the drill is inserted in the positive driver just above the jaws, and once there it cannot slip, even if the jaws are not tight. The Pratt Chucks are made to standard gauges, and are interchangeable. Cost no more than ordinary kinds. Send for booklet.

PRATT CHUCK CO.,
FRANKFORT, NEW YORK, U. S. A.

STUDY ECONOMY.

If you do thread cutting of any kind and still use antiquated solid dies, our improved Self-Opening and Adjustable Screw-Cutting Die Heads will save you 50%. It is worth trying.

Are You Booming Arnica?

We all remember the old way of riveting with the hand hammer and when you hurried it was a frequent thing to pound your fingers—then kuss words and Arnica, and, of course the work was RESTING. It made good candidates for revivalists, but commercially was a failure. The new way is to use our Elastic Blow Riveter—one thousand blows per minute and every one in the right spot. You can easily see the saving. Some manufacturers use forty of them. They beat the Arnica bottle for making money. Send for circular.

NEW DOTY MFG. CO.,

Janesville, Wis., U. S. A.

In machine shown in cut the knives for flat and round iron are independent of each other and of the punch, and both sets of knives as well as punch are at all times ready for use without any change. They are the most convenient machines for general shop use, combining in a single end machine all the advantages of a double end machine.

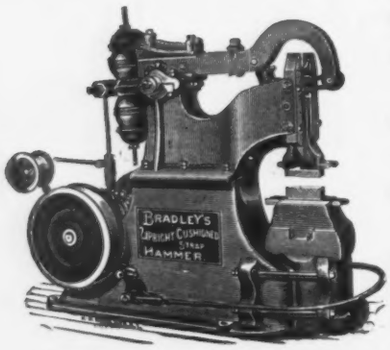
BRADLEY HAMMERS



Bradley Strap Upright Hammer.

are made in Helve and Upright styles with heads weighing 15 to 500 pounds and forge stock ⅛ to 5 inches diameter.

Each contains ⅓ to ½ more material than any other of same rating.

Their Anvil Blocks weigh nearly or quite double those of other Hammers.

Their output is guaranteed 25 per cent. greater than is possible with other Hammers of same rating.

They are the highest in price but the cheapest in fact.

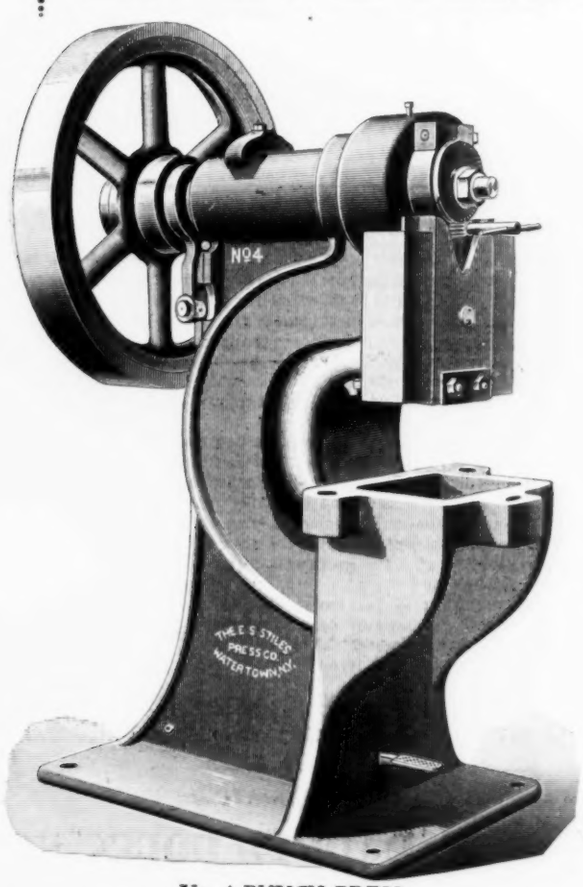
The E. S. Stiles Press Co.



No. 4 PUNCH PRESS.

FLY WHEEL PUNCHING PRESSES.

THE original design of this press is too well known and appreciated to require a detailed description. It is the best designed solid frame punching press constructed, and is acknowledged the leader for its particular work. In presenting our line of punching presses we have not attempted to improve the general design, but have added to it points that will be fully appreciated by press users and make it a superior machine in many respects. The weights have been increased; the distance from bed to end of slide made greater, thereby adapting it to a greater range of dies; the ways or guides made longer, preventing side thrust and shearing of dies and punches; and shaft diameters increased. Every point that our experience has taught us would benefit the press and increase its utility, has been carefully considered and embodied in our punching presses.

We claim superiority in the following points:

FRAMES—The iron used is of the greatest strength, and is constantly tested to maintain its standard of excellence.

CLUTCH—We have adopted a new clutch which was perfected and recently patented, and is far superior to any clutch now in use. Can be run in either direction; has three points of contact in wheel with flat surface instead of round; can be arranged to stop automatically part way down if desired; it is practically instantaneous; can be backed up to release dies; allows dies to be set with absolute safety while wheel is in motion; it is very simple; all contact points are of tool steel and hardened; it is very strong; it is absolutely reliable.

BALANCE WHEELS—The faces are wide for large belts, and the greatest weight is in the rim where most needed, giving great momentum.

SHAFTS—The shaft diameters are large and are carefully turned to a perfect fit.

SLIDES—The slides are particularly long and very carefully scraped to an exact bearing.

OIL HOLES are covered with patent dust-proof covers, which prevent bearings being cut from dirt.

COLOGNE " }

"Bliss" New Pattern Inclinable Press.

There is probably no type of power press that has met with such general favor among manufacturers of sheet metal goods as the line of inclinable presses illustrated, which we designate by the numbers 18 to 21. This line of presses has been recently re-designed, embodying all the latest and best ideas in press construction known to the trade. Experts in press construction will at once appreciate the straight line principle adopted, which not only produces a graceful appearance, but also a much more rigid frame, resulting in greater strength with the same amount of metal. The weight of these presses has also been increased, making a much greater increase in strength over the old pattern.

The slides and gibs are very long, thus insuring the best results and longest life for dies and tools usually operated in such presses. The shafts are of the best forged steel, of large proportions and well fitted. The slide connections in the larger sizes are made of forged steel, are bronze bushed, and practically unbreakable.

Our "Bliss" Standard Clutch, but of enlarged sizes and with several improvements in the mechanism, is employed, making it the strongest and safest in use, and is to-day unequaled for general work. The fly-wheel is bronze bushed, and the bushings may be easily removed when worn.

The press frame is so constructed that feeding devices, gauges, and other attachments can be easily applied. It may also be easily inclined to any angle that best suits the operator. It is built in several sizes, both as fly-wheel and geared machine, ranging in weight from 300 to 6,500 lbs. Write for further particulars.

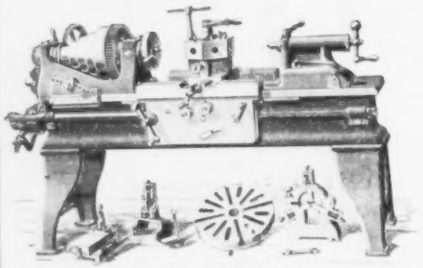
FOR IMMEDIATE DELIVERY.

Reduced Prices. **Correspondence Solicited.**

OWNING AND OPERATING

THE STILES & PARKER PRESS CO.

WHY This is the LATHE for you to buy



It has easy, quick and accurate adjustments of all feeds.
The range of feeds is very great.
Changes for screw cutting are made instantly; no gears to take off or put on.
The dimensions are liberal and in proportion to the service required of them.
The Lathe in general is easy to operate.
The workmanship insures satisfaction.

Sizes, 14 inch to 42 inch Swing. Beds in even lengths.

File Factory
FOR SALE

On Saturday, April 1, 1899, the plant of the late McClellan File Co. will be sold at the Saginaw County Court House, by Circuit Court Commissioner, to satisfy mortgages about one-third the value of the plant, which will be sold entire comprising real estate, buildings and all machinery.

The factory has a capacity of 500 dozen files per day, and is one of the most thoroughly equipped file factories in the country.

Plenty of cheap fuel. An elegant opportunity on a small capital to manufacture files for the trade, or to operate it as a recutting factory. For further particulars address

GEO. J. LITTLE, Saginaw, Mich.
For Mortgagees.

FOR SALE.

One Stiles & Parker Press, No. 3 and No. 4. One Sturtevant Blower and Countershaft, No. 0. All in good order.

The THOMAS LAUGHLIN COMPANY
Portland, Maine.

FOR SALE.

At great sacrifice, by order of Court to satisfy a mortgage, about 9,000 acres of land rich in ***Iron Ore, Manganese, Clays, Ochres, Umber, Sand, Building Stone, Hydraulic Cement Rocks, Limestones, Marl, Lime, Fine Farming Lands, Forests and Water Power*** Good railroad facilities by two competitive roads. Cheap coal and coke. Apply for full report, analyses, maps, price, &c. to J Stewart Walker, Court's Agt., Lynchburg, Va

ROLLING MILL
For Sale or Lease.

The property known as the Seyfert Rolling Mills is offered for sale or lease.

This Mill is located on the Wilmington & Northern R. R., five miles from Reading, Pa., and is equipped for making Sheared Pipe Skelp, Sheet Iron, Plate Iron and Puddled Bars.

The property is in perfect condition and can be started up in 24 hours time. Is, without doubt, one of the best mills in the state; has always been a money-maker and should prove a very desirable and profitable investment to anyone desiring to go into the iron business.

This Mill would be indispensable to the Wrought Iron Pipe Trust now forming.

For terms or particulars, apply or address

HERO STAMPING WORKS,

Room 407, Cuyahoga Bldg., Cleveland, O.

Locations for Industries.

The Chicago Milwaukee and St. Paul Railway Company has all its territory districted in relation to resources, adaptability and advantages for manufacturing, and seeks to secure manufacturing plants and industries where the command of raw material, markets and surroundings will ensure their permanent success.

A number of new factories and industries have been induced to locate—largely through the instrumentality of this company—at points along its lines.

The trend of manufacturing is Westward. Confidential inquiries are treated as such. The information furnished a particular industry is reliable.

Address

LUIS JACKSON,
Industrial Commissioner, C., M. & St. P. R'y.
Old Colony Building, Chicago, Ill.

Executor's Sale to Close an Estate

OF

Valuable Coal, Timber & Farming Lands

In Somerset County, Pa.

6,000 ACRES MORE OR LESS.

ADRIAN H. MULLER & SON

will sell at auction on

TUESDAY, APRIL 4th, 1899,

At 12 o'clock noon, at the N. Y. Real-Estate Salesroom, No. 111 Broadway, New York City.

This property is about 2⅝ miles west of WEST SALISBURY STATION on the SALISBURY BRANCH, BALTIMORE AND OHIO R. R., which is a good shipping point; the Railroad having surveyed for an extension of their road to within ¾ mile of these lands, makes it easy of access. The Mutual Telegraph Co. run over the lands around the public roads.

THESE LANDS are underlaid with BITUMINOUS COAL, FIRECLAY, IRON ORE and LIMESTONE, and have a fair average of the several kinds of Timber grown in this section, viz.: WHITE OAK, RED OAK, HEMLOCK, ROCK OAK, ASH, POPLAR, CHERRY, BLACK BIRCH, CHESTNUT, etc.

After the timber is cleared off, will make good farming and grazing lands, being well supplied with running streams.

THE ATTENTION OF COAL COS., IRON AND COAL MINERS, AND RAILROAD COS., ALSO CAPITALISTS, IS CALLED TO THE SALE OF THIS PROPERTY.

50 PER CENT. may remain on **BOND AND MORTGAGE** at 5 per cent. Interest for One Year or all cash if desired. **Reports of E. V. D'Anvilliers, Geologist and Mining Engineer, of Philadelphia,** and other particulars can be had at the **Auctioneers'** office, **24 Pine Street, N. Y. City.**

Paris Exhibition

INTENDING EXHIBITORS, who have not yet completed their arrangements for representation, are invited to correspond with us. We are prepared to take charge of exhibits from factory to exhibition grounds, and return, attending to all the work entailed. Our Paris Branch has moved into new spacious quarters at No. 76 Rue de Turenne, and is equipped with a numerous staff of well-trained commercially and mechanically skilled assistants, who speak the language of the country. We are particularly well situated to do work of a nature apt to produce the best practical and profitable results. We are prepared to finance and guarantee approved transactions, that may offer themselves in connection with the Exposition.

Iron and Steel.

This is the only complete work on the subject.

It gives practical suggestions in regard to the arrangement of the store—office, shelving, counters, racks, bins, sampling, window display, etc., etc.

It describes the practice of Hardware merchants in all parts of the country, and many different methods of accommodating and displaying leading goods.

Illustrations and detailed descriptions with measurements are given, so that Hardware merchants can readily adopt the methods described in the volume.

This book with its mass of practical and detailed information will be of great service—

To progressive Hardwaremen who are desirous of improving their stores;

To those who are intending to open new stores;

To those who want information as to the best methods of displaying and accommodating any given class of goods;

To those who wish to know how other merchants arrange their stores;

To those who are interested in the question of window display;

To those who are extending their business in any direction;

To those who desire practical suggestions in regard to the arrangement and sale of the different Hardware articles.

make Circulars, Folders, Price-Lists, Catalogues, Trade Primers, Circular Letters, Announcements, Mailing Cards, Booklets, Notices, Newspaper, Periodical and Trade Journal Advertisements, etc., etc., and I make these things as **UTTERLY SELFISH** as possible.

Really "Selfish" advertising is the kind that sets **YOU** apart by yourself in a flock of *one*. It is distinctive and anti-rut alike in its matter and manner, never "funny," but ever peculiar, and with a flavor distinctly its own.

I desire correspondence from advertisers who claim to know a good thing when they see it. From readers of this, inclined to be somewhat skeptical, I especially desire to hear.

I'm quite a skeptic myself.

I gain *new clients*, chiefly from those who have first seen what I have been doing for old ones.

If you desire to see samples of my "doings," please state what you wish sent.

NOTICE.

BEING advised by many retailers and consumers that when they place orders with jobbers for Star Hack Saw Blades other brands are frequently substituted, we desire to notify all parties that we will, upon request, either furnish names of jobbers throughout the country who will supply the Star blade, or else we will send what is wanted ourselves. Each dozen blades are labeled with the brand, etc. Don't be misled when blades are supplied without labels, but look for the ★ which is stamped in every blade we make near the pin hole. Our Star blades have become very staple, and some dealers attempt to increase their profits by substituting inferior goods which they buy at lower prices.

Take Your Choice

There are two lines of bicycles that hardware dealers can handle,

SELLERS AND STICKERS.

A bicycle manufacturer may and may not have a line that goes with a hardware dealer, a jobber picks from the whole lot the goods that he offers with the wants of the hardware dealer in view. From the many good agencies established and from the very many testimonials we have we must feel that we have been successful in our selections.

IMPORTANT DECISION RELATING TO THE

HEINISCH

TRADE-NAME ON SHEARS, TRIMMERS, &C.

The U. S. Circuit Court, Southern District of New York, Judge Townsend, has rendered a decision in the suit of "R. Heinisch's Sons Co. vs. Hermann Boker & Co."

"The Complainant is entitled to an accounting, and to an injunction restraining them from using the names 'Heinisch' or 'H. C. Heinisch' on its Shears, Labels, etc., and otherwise, in any way which will interfere with Complainant's enjoyment of the benefits of its Trade-name."

Referring to the above decision we would respectfully state our determination to protect our rights in the premises and warn all persons against any imitation of our Trade-name.

PEARCE'S IMPROVED CAHOON PATENT BROADCAST SEED SOWER

Is as much superior to any other device for sowing grain as the modern electric light is better than a tallow candle. The CAHOON is not the lowest price seed sower, but taking into consideration the durability of the machine, the ease with which it is operated, and the quality of its work, it is the cheapest. Pays for itself every day that it is used. Sows all kinds of grain and cleaned grass seed; does five times as much work as can be done by hand with two thirds the amount of seed, and does it better than it can be done in any other way.

Dealers who handle the CAHOON make a profit and a satisfied customer at the same time. They stay sold. A prominent hardware dealer in the South wrote us under date of Feb. 13, '99, "We are not handling any other broadcast seeder similar to yours. Tried this some years ago and got enough of it."

Retail dealers supplied at factory prices promptly by our wholesale agents at all principal distributing points.

GOODELL COMPANY,
ANTRIM, N. H.

The '98 Chicago Clipper Retails For $8.75.

HARDWAREMEN—DO NOT ORDER

another old-fashioned, out of date two-hand horse clipper. Be enterprising and order the '98 CHICAGO CLIPPER. The greatest clipping machine ever invented; holds the world's record for fast clipping; time 14 minutes. You can sell one of these machines to every man who used to buy the old fashioned two-hand variety. Ask your jobber about them or send to us direct.

HAIR CLIPPERS.

If you want a clipper "with a reputation" insist on the "Stewart Patent." There is no other "just as good" and they will cost you no more than the inferior kind.

We have just been awarded Gold Medal at Trans-Mississippi Exposition, highest and only award for horse clipping, sheep shearing and cattle grooming machines.

McIntyre's

Dry Battery Portable Electric Safety Lamp...

This is an Electric Lamp set in a White Enamel Parabolic Reflector, and can be attached to the cap or any part of the clothing by means of a stick pin attached to reflector and connected to the battery with a flexible cord. The battery is arranged to be carried on a belt or in the pocket. So the user has free use of hands. The current can be turned off when not in use. Dry batteries are used and can be recharged from direct Incandescent Electric Current Charger and full directions go with each Lamp.

IS USED BY THE FOLLOWING: For Watchmen, Miners, Mine and Gas Inspectors, Boiler Shops, Oil and Gas Works and Gas Fitters, City Sewer and Underground Cable Inspectors; Powder Mills and Warehouses where explosive materials are manufactured and stored; exploring cellars and trenches where leaks occur, and investigating pipe connections where it is impossible to carry an oil lamp or candle for fear of explosion—and all parties requiring a safe portable light. The whole outfit is neat and compact.

No. 1 weighs 2 lbs., 1½ C. P. Price complete, $4.00. For Meter Reading Only.

No. 2 weighs 3 lbs., 4 C. P. Price complete, $6.00. For General Use.

No. 3 weighs 12 lbs., 10 C. P. Price complete, $12.00. For Several Persons to Work By.

ASK YOUR JOBBER FOR

Oatman's Handy Hoops.

FOR Tubs, Pails, and Barrels.

The Bestthing out. Needed in every household.

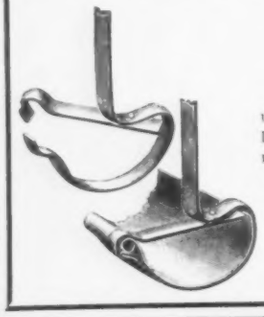
They are packed with rivets for riveting together, which is the only way that a good smooth job can be done. You cannot use a coupling of any kind and have the hoop fit.

These hoops are **FLARED AND ONE END PUNCHED** all ready to get the size and rivet together by placing the tub bottom side up, and putting the hoop around with the punched end lapped on outside, so that you can mark for the two holes to be punched. These hoops do away with the annoyance of pulling a bundle of hoop iron apart to get a few cents' worth of hooping.

Do not be a Back Number, but sell Oatman's Handy Hoops. Please your customer and make money. Sells on sight. Put up in all sizes, both plain or galvanized, in neat display box, with hinged cover, rivets included.

OATMAN'S Adjustable Wrought-Steel EAVE TROUGH HANGER.

HAS NO EQUAL.



It is the best for all kinds of roof where hanging troughs are used, and especially for slate roof, because you can put the hanger on first and leave the button turned off; and when the roof is finished the trough can be put in and the hanger buttoned.

Sold by all leading Jobbers. Ask for prices.

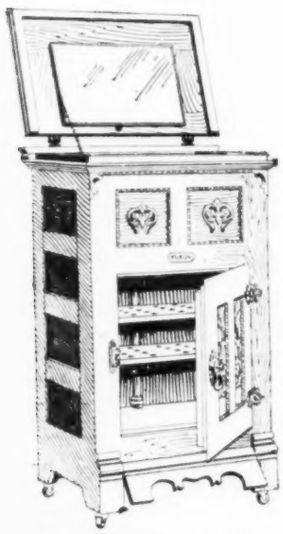
YUKON *Refrigerators.*



The Yukon combines all the best points of the best makes with several new features, which makes it the best Refrigerator on the market.

The Yukon is made in two styles, with ***Removable Flues,*** and with the ***entire Ice Chamber Removable.***

We note some of the excellent features of the Yukon:

Thoroughly seasoned ash lumber.
Elegance of finish.
Carved panels.
Swinging and removable base board.
Solid bronze hardware, Roman gold finished.
Zinc lined. Patent casters.
Galvanized iron flues, ice rack and shelves.

The shelves being so constructed that small dishes placed upon them will not tip over.

Patent Trap, connected with waste pipe in bottom of provision chamber, where it is most accessible, both trap and waste pipe being easily removed, cleaned and replaced, without a back breaking process or poking with a stick.

The insulation used is ***Granite Rock Wool*** and Charcoal Sheathing.

Buy the Yukon and you will have the best Refrigerator made as well as an elegant piece of furniture.

THE TOLER

Liquid Door Check and Spring

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong simple and effective**, giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

Manufactured by

JOHN TOLER, SONS & CO.,

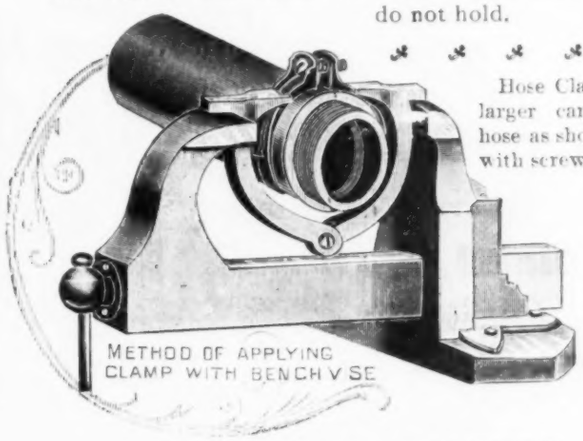
A CURE FOR LEAKY HOSE

is for the dealer to order all hose coupled with *SHERMAN CLAMPS*, as that will remedy many leaks that come from wire bands that stretch or cast clamps that break and do not hold.



Hose Clamps 1 in. and larger can be put on hose as shown in cut, or with screw driver alone.

Small sizes ½ and ¾ in. for lawn hose are applied to hose with screw driver alone.

SOLD BY ALL JOBBERS.

Manufactured by **H. B. SHERMAN MFG. CO., Battle Creek, Mich.**

NEW CRESCENT HOSE MENDER.

IT'S FLAT—Won't cut the hose; mender and bands are of brass; pliers of iron, handsomely Japanned. Simple, convenient. Screw menders tear the lining and wire bands cut. Our flat bands make secure couplings and positively will not injure the hose. Are rapid sellers.

Send for prices and catalogue of these goods and our line of

Lawn Sprinklers, Bath-Room Fixtures, etc.

THE
READING STANDARD
BLOCK (Patented).

This is the latest addition to our line of CHAIN BLOCKS. It is high in efficiency, has an adjustable automatic brake sustaining the load at any point of the lift, hoists and lowers rapidly, and being light and compact, can easily be taken from place to place.

When in the market for Chain Blocks write us for prices. We make other styles besides the Reading Standard.

Reading Crane & Hoist Works,
READING, PA.

TYLER'S SAFETY WEANER

Pat. Oct. 2, 1888

No sharp points in front to prick or gouge the cow.

Perfectly safe and harmless. Is the only Weaner having any side protection to prevent sucking sidewise, and is warranted to wean the most obstinate case without cruelty or injury. Does not go through nose or wing loose to wear the nose or make it sore.

HALTER WEANER.

Pat. Sep. 6, 1892

Does not go into the nose, but is put on same as a halter and will wean any calf and prevent cows sucking themselves. Made in four sizes, same as safety weaner; No. 1 for small calves, No. 2 for large calves, No. 3 for yearlings, No. 4 for 2 year olds.

FOR SALE BY ALL JOBBERS.

GLIDDEN'S METALLIC REPAIR OUTFIT

The one that has the Hinged Plugs.

THIS is the smallest, neatest, most compact and practical repair outfit ever offered to the public. Complete in a tin box 1⅝ inches long, 1 inch wide and ¼ inch thick. It will repair a puncture at once, without the use of cement, and any woman or child can use it. The plug is made of metal with a **hinged head, which can be forced into a much smaller opening than one with a stationary head.** Two sizes of plugs are furnished with each kit, which will fit ordinary punctures; also a cutter is furnished, to be used when the puncture is too small to admit the plug.

Directions for use. Place the flat plate of the plug so it will be loose on the key. Screw the key into the plug and insert into the hole, leaving the flat plate on the outside of tire. Draw back the key so that the plug will rest flat on the inside of the tire. Screw the flat plate to plug with wrench (left hand thread), and turn key to right. Remove the key by turning to left, and you have a permanent repair which does not injure the tire or its looks.

DISCOUNT TO THE TRADE, ASK YOUR JOBBER FOR IT.

BICYCLE REPAIRING

A Manual of Practical Methods of Repairing Bicycles.

By S. D. V. Burr.

Fourth Edition, Revised and Enlarged.

Cloth Bound. 208 Pages. 205 Illustrations.

THE BICYCLE is treated as a machine composed of many parts, each of which may be damaged to a greater or less extent. Each injury to each part is discussed fully, and the best methods of making the necessary repairs are explained thoroughly. The treatment of assembled parts, in such operations as brazing, nickel plating, enameling and the like, is described in detail.

Almost every topic is illustrated with one or more original engravings.

The book deals with the simplest and most useful appliances for repairing. It is in every way practical. It is recommended not only to manufacturers of bicycles, but more particularly to all those who handle bicycles, whether as dealers or repairers.

Price, Post-paid, One Dollar.
